Wp Tags Qr Code On Wordpress Site

DOWNLOAD HERE

WP Tagz - The QR Code Era has Arrived! If you are a serious marketer then this wordpress plugin is an absolute must for your sites. WP Tagz is able to promote a QR code and send the user to wherever you want to send the person whether it is to a: - Website - Phonecall - Sms - Blackberry messenger contact - WiFi Network for Android - Bookmark a Website - You Tube url - Iphone - Vcard - Tweet on Twitter - Send an email - Free Formatted Text QR codes has been very common in Japan for the last few years and are now entering the rest of the world. Basically what it is, is a special code you can show on a screen, newspaper, magazine, website or tv screen. Then you can take your smart phone and let it registrer the code and the phone will perform the desired action such as going to a web site. This means you can easily integrate anyhing you might have on a website with a smartphone. REVEALED: The QR Code Solution For WordPress That Marketers Want More Than A Cure For Cancer ... The 'Enhanced QR Code' Generating WordPress Plugin! Tags: wp
