Grab These Brand New Premium Header Templates With Full PSD Source Files And Easily Create Your Own Awesome Headers In Minutes! Premium Header Pack V2 [Rights: Personal Use Only] "Download Free Preview" To See Full Sales Page What makes these header templates special? When it comes to most templates packages (especially collections of 100's of "niche" templates), the quality is usually not that great, to put it mildly. Most other templates packages go for quantity over quality. They might give you 100's or 1,000's of templates, but they're all mostly poor quality stuff you wouldn't use on your actual site. With THIS package, I focused on QUALITY over quantity, and created 25 premium header templates instead of 100's of cheap ones. All of the formatting, styling, and color combinations are already in place. The whole "design" part is done, so you don't have to have an eye for that sort of thing to create a great header. It's all done for you. You can... 1. Use these headers as is. Just change the text to your text, and maybe add an image of your own. And boom you have a killer header in minutes. 2. Play around with the colors and styles. Create your own color schemes to match your site. Move things around. Resize the header to you exact size. Customize just certain elements. And in just a few minutes you can have a fairly different and unique look. 3. Or just take certain parts you like from a header (like text or some effects or some layouts), and add them to any of your own existing graphics to spice them up. You get full source files to ALL these templates, and everything you see on the headers comes on it's own layer. So there is a lot of premium graphics elements at your disposal here. These awesome headers could potentially save you hours of work, and give an added flair to your existing graphics. P.S. These are fully layered PSD templates. Photoshop is preferd to use them, but you can also use them with any other program that opens layered PSD files (like Photoshop Elements or Gimp).
