You can choose from over 100 different niche categories on this article directory site alone. With this solution, it really is a very simple way to get highly targeted self-updating article content - with very little effort. However

there is a big flaw with all Javascript feeds. Javascript feeds are visible to your visitors, but since they are based on Javascript, they are NOT readable by Search Engine spiders. In fact, from a Search Engine perspective, these feeds are completely invisible. This is rather unfortunate as this undermines our primary reason for wanting to add them. However that's where your copy of Auto Content Pro comes in. The software fixes the problem, by automatically converting the feeds provided by the article directory into fully search engine friendly content. Easily Add Search Engine Friendly Feeds To Your Sites Auto Content Pro can be used to add search engine friendly Javascript feeds to any web page - in just a few seconds.
