Download Page Protector If you sell ebooks or software, you will almost certainly know about the problem of product theft. Lots of people will try to gain access to your product download (or thank you) pages without paying, in order to steal your ebooks or software. People usually do this by trying to guess the name of your download page. You probably already reduce this risk by giving your download page a name that is hard to guess. However tests based on analysis of server logs have shown that some people will spend up to an hour trying to guess their way into a download page. Some now even use special hacking software, left to run overnight automatically trying millions of permutations to guess the name of your download page. The fact is that simply giving your download page an unusual name is no longer an effective way of stopping those determined to steal your products. Download Page Protector quickly and easily protects you from this problem, by automatically adding a special script into your download page. The special script requires a security code to be included in the link for the download page. If the code is not included in the link address, the script will automatically redirect the visitor to your home page preventing downloading of your products. This makes it much harder for someone to guess their way into your download page. Automatic Search Engine Protection A second threat to your products arises if your download page gets listed on a search engine. There are many ways that this can happen, including dishonest customers posting the link to a forum. Of course, if the link to your download page gets onto a search engine, its easily available to everyone. Your product is free to anyone who searches for it! Download Page Protector provides very simple protection from this problem by automatically inserting a special robots meta-tag in your download page. Most of the leading search engines will not list pages containing this special tag, preventing this search engine problem from ever occurring. Unfortunately there are still a lot of search engines which ignore this special tag. Download Page Protector therefore offers a secondary search engine protection mechanism. Anyone coming to your download page directly from a search engine link will be automatically redirected to your home page, preventing them downloading your products. Although it is preferable to avoid your pages getting onto search engines, this secondary mechanism offers valuable protection if it does happen. A Highly Versatile

Protection System Download Page Protector has been fully tested on the two primary payment services for ebook and software sales, Clickbank and Paypal. However unlike most other solutions, Download Page Protector is not restricted to these services and should work with any payment service. Your Quick And Easy Solution
