

# Best Php Scripts

[DOWNLOAD HERE](#)

- 1) Expired Domain Finder Script: This PHP script has become a very hot item within the last 6 months! This Script will look up domains that have expired, or are about to expire in both the Yahoo! Directory, AND Dmoz Directory! This script will also allow your customers to monitor domains that they are interested in; it has a domain digger, and has PayPal IPN functionality built right into the script! There are many websites selling memberships using this script for up to as much as \$29.99 per month! The script comes with an administrator section where you can manage the look, and feel of your website, as well as manage your members, set up different membership packages and more! The fact that this script uses MySQL means that it is extremely fast, and can look up expired or soon to expire domains in an instant!
- 2) PHP Auto Hits Script: With this new PHP Auto Hits script, you can set up a profitable traffic exchange service, complete with an auto-surfer and everything else.
- 3) PHP Link Listing Script: The Script Is Unique from Other Link Listing Scripts In That It Creates Different Rooms For Different Links! Making This Powerful Script its Own Little Web Surfing Tool For The Visitor Of The Site! It Is More Or Less A Nice Little Search Engine! Once A Visitor Signs Up For The Website they are placed on a mailing list, and the script automatically sends out an email to each visitor every time a new link is added! You Can Make Money Selling Advertising To Other Webmasters! The Automatic Email Will Guarantee Your advertisers that their link will be seen! The Visitor will have a choice on whether to receive an email for each link OR one email with all new links listed! There is a top ten list for the most popular links! When you add a new wing, you choose a name and also who can get there. You may have rooms that are off-limits to the public. These private rooms will never be shown to the public or appear in the Top 10, Last 10 and Random lists! A very nice script! Comes with MASTER Resale Rights!
- 4) PHP MySQL Yahoo Style Link Directory/Search Engine: This Script is a PHP and MySQL powered links database which allows You to run a database driven categorized links section on a web site - similar in structure to Yahoo or any other categorized links collection. Features include: \* Fully database driven utilizing MySQL. \* Full template system allowing you to control the HTML output of the script without needing to alter any of the PHP code. \* Easily customizable if you wish to alter the script in any way. \* Very easy to admin via the web -

log in and add / edit categories and links. \* Visitors to your site can recommend new links, which you can then validate. \* Allows visitors to rate your links from 1-10, and displays average rating. \* Rating a link more than once is discouraged using cookies. \* Number of hits each link has received is recorded and displayed. \* Very easy to set up and use, thanks to an installation script and config file. \* Built in Search Feature. \* Most popular, top rated and newest links pages. Comes with MASTER Resale Rights!

5) PHP MySQL Website Stats Business: This script is simply awesome! It is a new PHP script, and will allow you to set up your own link tracking business! There are two different memberships you can sell with this script, and both are beneficial to you! The lite membership costs less, but requires your customers to keep a banner to your website on theirs in order to track their stats! The pro membership of course costs more (Whatever price you set!) and does not require the customer to link to your site! The script automatically takes payments via the PayPal subscription method so you are insured to receive your fees every month! It also keeps track of your customers statistics daily, weekly, and monthly! This is a VERY nice script! Comes with MASTER Resale Rights!

6) Automated Form Submission Prevention Script Did you ever sign up for a website that makes you enter a combination of distorted letters and numbers to prevent automated signup and wish you could add that script to your site? Well now you can. This script generates distorted images of random sequences that most humans can read, but computers cannot, therefore to prevent automated robots from submitting forms and signing up for your service. Comes with MASTER Resale Rights!

7) A Sophisticated PHP Ecommerce Site This script will allow you to run a very nice, and very secure ecommerce area or store front from your website! It is very easy to install and comes with an installer script so that all you need to do to set it up is point and click! This in-depth script will keep your customers entire records safe in a database, and will allow you to update orders and more! Highly Recommended! Comes with MASTER Resale Rights!

8) The Well Known osCommerce PHP Shopping Cart! However This Is NOT The Snapshot Version! This Is The MILESTONE RELEASE!: osCommerce is quickly becoming the shopping cart of choice for many online merchants! This script is simply AWESOME! You can literally have a store set up and ready to take orders within an hour! The script comes with a VERY easy to use admin section where you add all of the products, manage customers, shipping, tax, payment process, inventory, and just so much more to mention! You can use MANY, MANY different payment gateways with osCommerce including PayPal, 2Checkout, authorize.net, and many more! This version of the script is NOT simply the snapshot version THIS IS THE MILESTONE

RELEASE! Comes with MASTER Resale Rights! 9) Your Own FTP Program Written In PHP: This is another truly GREAT PHP script! This script actually allows you to set-up and run YOUR OWN FTP SERVER! The best thing about having your own FTP server is You know who is using your FTP and if there is someone trying to retrieve your password for your server (which is impossible to do with this script I might add)! You will be able to set up and use your own FTP program with ALL of the benefits of the expensive FTP software! If you are a web host, or have any anonymous FTP users this script will also let your customers use it for their uploading purposes as well! Comes with MASTER Resale Rights! 10) A FAQ Generator PHP Script: Have you ever wanted to find an easier way to add your customers frequently asked questions to your website? This script will easily allow you to add topics, and questions to your new FAQ page! It is very easy to install, And comes with an administration section so that you can add the information to your page/pages directly from your web browser! Every site needs to have a FAQ page for the sake of its clients, and this script provides the easiest way to build one! Comes With Reseller Rights 11) Two Very Nice PHP Toplists Scripts! The First Is A Detailed PHP Script With MANY Features: If you have ever wanted to run your own toplist website THIS IS THE SCRIPT FOR YOU! It comes with such advanced features as Anti-Cheating, Rules members MUST follow, Easy to match the look of your website, looks up lost passwords, allows you to decide if you want to allow banners to be used by your visitors, Allows you to sell advertising for your toplist, and a lot more! A very sophisticated script! Comes with MASTER Resale Rights! 12) The Second Is A VERY Nicely Designed PHP Topsite Script: This toplist script has a VERY nice design to it! It is very easy to install, and is template based so all of the HTML work has already been done for you! This toplist script is limited ONLY BY YOU! You can allow as many or as few links to be added to the entire list, or even page by page! Many toplists make the major search engines fast due to the amount of links, and visitors they receive! This is a great way to SELL advertising Or simply advertise your own websites! Comes with MASTER Resale Rights! 13) Two Auction Scripts 1 PHP, And 1 Perl/CGI! The First Is a Popular PHP Auction script! This is a VERY nice PHP auction script! It Is a very easy script to install! There are Many Premium features that come with this auction script! 31) A Users Online Script This Users Online script is written in PHP and allows you to display the exact amount of online users on your website in a very convenient and efficient way. Users Online scripts make your website look high-tech and professional and are something no webmaster should be without on his/her website. Comes with MASTER Resale Rights!

32) Awesome File Transfer Script This awesome file transfer script allows your users to upload and download files from your server; it is highly configurable with user accounts support. Users can give descriptions to files, create and delete their own files and directories and sort lists by filename, upload date or downloads. Currently supports English, Italian and Spanish, but you can customize the application in your language too. If you own a community website such as an online forum or wish to start one, this is the perfect script for you either as a stand-alone or an extra service on your website. This script can get visitors to come and keep coming back time and time again. Comes with MASTER Resale Rights!

33) Affiliate Banner Rotation Script This affiliate banner rotation script is probably the most easiest to install ad manager on the web! All you have to do is upload a list of all your affiliate advertising codes in a list and that is about it. Simply include the script using a PHP include code (included) and you're on your way fast and easy. The script changes which advertisement will be viewed next making sure that all your adverts get equal viewing (does NOT show at random like most scripts) and the script requires the page to be refreshed to change the advertisement seen so that you get extended viewing per banner. Comes with MASTER Resale Rights!

34) Simply AWESOME Dating Website Script This is simply one of the best dating scripts available written in PHP & MySQL. Several cool features available in this script are users can add, edit and delete profiles, upload up to three photos, user messaging system, users can set to be notified when another user will read their message, users are given numeric usernames to increase privacy, who is online feature, recommend us feature, current birthday list and statistics on the main page (amount of men and woman members). Comes with

MASTER Resale Rights! 35) Simple yet Powerful Download Counter Script! This simple yet powerful download counter will log the details of anyone who downloads any file you specify. It will log their IP Address, Remote Address, browser type and even operating system and you can easily modify and add new downloads through a powerful password protected admin panel. This script can keep track of an unlimited number of files. MySQL and SSI (Server Side Includes) are required. Comes with MASTER Resale Rights! 36) Another Users Online Script! This Users Online script shows how many users are on your website, you can change the time in which the MySQL Database Table is refreshed so you can count users online per minute, hour, week etc! This script is more user friendly and comes with a setup.php installation file which will set the script up for you. Comes with MASTER Resale Rights! 37) Text based counter written in PHP You can quit paying for traffic counter services. This script is a very simple and super easy to install webpage hit counter. The font and color of the counter are completely customizable and there are only 2 files to upload to your web server. Plus you will even have the ability to separate the thousands for added customization. Comes with MASTER Resale Rights! 38) A FAQ manager written in PHP and MySQL This PHP FAQ manager is a simple script yet powerful script that will help you to create (and manage) a FAQ (Frequently Asked Questions) page on your site. It is written in PHP, MySQL and FastTemplate so it is fast and easy to configure. Every website needs a FAQ page so you dont look like just another fly-by-night website that wont be in business for longer than a month or two. Comes with MASTER Resale Rights! 39) A Sports League, Fixture and Prediction Management Script written in PHP and MySQL! [NEW!] This powerful script is a football management software written in PHP that use a MySQL database. It has a modular design and comes with two free modules. The league module features wizards for managing a football league, fixtures, games, teams, results, divisions, etc. League team statistics are automatically calculated and updated every time a game is played/entered. The news module features an HTML news creator/editor that can be used to post news. Comes with MASTER Resale Rights! 40) A PHP Whois Lookup Script! This script is a ready to use WHOIS lookup PHP script that all you have to do is unpack, upload and you are ready to go. The script checks for .com, .net, .org, .biz and domain names. Comes with MASTER Resale Rights! 41) HOT PHP Visitor Logging Script! This Hot PHP script is a state-of-the-art visitor logging script that can easily display 10 vital

statistics about your users. The advanced visit logs this script generator tells you the IP Address, language, browser, operating system, if the user is new to your website, date and time of visit, last visit, days since last visit, referrer page and the keywords they used to find your website (if applicable). Comes with MASTER Resale Rights!

42) Awesome LiveHelp Script! A live Help support chat system that allows the operators of the websites to monitor their visitors as they are browsing the site and proactively open a chat session with the visitor. Other features include either text based database or MySQL database, chat notification, user is typing message, multiple chat sessions and multiple operators. Comes with MASTER Resale Rights!

43) PHP & MySQL Content Management System This hot script installs in just minutes on any Windows, UNIX, Linux, or BSD based web server and setup is made super easy through a complete web-based installation system and an included installation guide. Once this software is installed changes to the content of your website is made in complete real-time through an easy to use web-based administration control panel. The control panel allows you to tune every aspect of your web sites visual appearance and layout and also provides an easy to use content authoring & management approach unique to this script. The visual appearance, layout properties, and navigation scheme of the web site can be instantly changed at a global level selecting from installed professional looking skins and navigation bars which will automatically reformat the look of your content on the fly while leaving your database driven content completely untouched. Users of this script will find that authoring and editing content for the web site is a snap by making use of the enhanced authoring interface which includes support for both WYSIWYG editors and plain text/HTML markup languages. Uploading and managing your files is also simple using the included file management utility allowing you to upload your images, documents and other files directly from your computers hard disk to the web server where it will become available for use in your websites content. This script is a must have for webmasters who are looking to make completely managing their website a breeze without a lot of programming knowledge. Comes with MASTER Resale Rights!

44) An Electronic Reminder Script This script allows web-clients to set up reminders to automatically email them at a certain time to remind them of special events. They can set up a one-time reminder or a recurring reminder and they can have it notify them in advance. Comes with MASTER Resale Rights!

45) Hot Mailing List Script! This mailing list management script is written in PHP and all subscriber info is stored in a MySQL database for security. Features include checking whether a subscriber is or isnt already registered/subscribed, sending out messages at the time of subscribing and

unsubscribing. A powerful and user-friendly administration control panel allows you to send messages, list and delete subscribers, supports HTML emails, gives a preview of the message before sending, logging system, Multilanguage support for English, French, Italian and German, plus a user-friendly web configuration and installation system. Comes with MASTER Resale Rights!

46) Web-based Image Management System! This hot web-based image management system is written in PHP and uses MySQL. It features cataloguing by standard comment fields or Photoshop-type embedded comment fields, sub-categorizing into separate repositories, database searching capability, and more. This is a great script! Comes with MASTER Resale Rights!

47) Web-based POP Email Client! This script is a web-based POP mail client and is very simple to install but nevertheless a quite advanced program. Some of its features include easy to install (does not require PHP to be compiled with IMAP support), reads and sends attachments, displays text/HTML attachments in-line (while still giving you the option of saving them to your hard drive), all the basic functions (send, receive, reply, reply to all, forward, delete), view all headers or the full source of the email, works even if the user has disabled cookies, localized date field, translated into several languages, can be set up to check for new messages automatically, customizable page layout, and more. Awesome Script! Comes with MASTER Resale Rights!

48) Hot Fully Featured Web Portal System This script is a web portal System for any webmaster; you can set it up as a storytelling software, news system, online community or whatever you want your site to be. Port the system to your local language and customize every aspect of this remarkable script. Each user can submit comments to discuss the articles, similar to Slashdot, only faster and more secure. Features include a web based admin, surveys, top page and access stats, user customizable box, friendly admin GUI with graphic topic manager, option to edit or delete stories, moderation system, customizable HTML blocks, user password encryption and retrieval, search engine, backend/headlines generation, and more. Written in PHP and requires Apache, PHP and MySQL; the over-riding development philosophy for the software is performance, privacy and security. Comes with MASTER Resale Rights!

49) Nice FFA Links Page Script Out of all the basic FFA (Free for All) links page scripts I have seen I actually like this one. This script allows visitors to add links to your page in a specified category and it is quite, if not super, easy to install and the administration area supports the deleting of existing links. FFA Links pages are a great way to look established and keep your visitors coming back to your website again and again. Comes with MASTER Resale Rights!

50) Highly Advanced Guestbook Script This highly advanced guestbook script is

written in PHP and uses MySQL. It includes many useful features such as preview, templates, email notification, picture upload, page spanning, HTML tags handling, smilies, advanced guestbook codes, language support and it has a great interface to seal the deal. The admin area lets you modify, view and delete messages which gives the owner extra control. Comes with MASTER Resale Rights!

51) Powerful Portal with Content Management This script is highly customizable and high powered all in one system; it provides content management combined with the power of a portal by including in the core package modules features such as FAQ, polls, and forums. This script uses dynamic-template-design which means you have the power to control what your site will look like. Themes are included, but not required as you can create the page however you want and this script will just insert code wherever you want it. Written in PHP and utilizing MySQL to make it amazingly fast and secure, this script is a great solution for all size website communities. Comes with MASTER Resale Rights!

52) PHP Online Classifieds Script This classifieds script is an easy way to set up a classified ads website; it is designed in such a way that it is extremely easy to change the look and feel of your website. You can design your pages around the functionality of the application. Although this script does give you a lot of control over the look and feel of the site, it lacks an interface for advanced administration features. However all the administration can be done through an interface such as phpMyAdmin. If you know how to use phpMyAdmin or a similar application and are familiar with relational databases, it should be really easy to administer categories and users, etc. Comes with MASTER Resale Rights!

53) Fully Featured Web Event Calendar This is a customizable web calendar developed using PHP and powered by MySQL. The calendar is viewed in month format with a popup window detailing the events of each day as they are clicked on. The title and colors are fully customizable within a single file and the application can be modified to work with other database types. Comes with MASTER Resale Rights!

54) A PHP Bookmarks/Favorites Script This PHP Bookmarks script is a web-based program that allows you to store your bookmarks and display them in many useful ways. This script will sort your bookmarks with usability in mind, keeping often-used bookmarks at your fingertips. It has a bookmark search, private/public bookmarks, nested groups, usage rankings, popularity sorting, and a quick add feature. Comes with MASTER Resale Rights!

55) Client Invoicing Script (HOT) This is a MySQL powered PHP program for invoicing clients so they can view/download invoices. The system allows an administrator to enter the client details and invoices. Each client must be given a username and password to login to view their invoices and the administrator can

view the full database by client, date, amount etc. There is an optional email notification system and full setup instructions included. Comes with MASTER Resale Rights!

56) ICQ Pager Script This script enables you to put a ICQ pager form on one or more of your web site pages; the visitors to your website then can use this form to send a short message to any ICQ user. A cool script that will keep your visitors coming and coming over and over again. Comes with MASTER Resale Rights!

57) Frequently Asked Questions Management Script This cool script allows you to administer a websites frequently asked questions. It blends easily with your site, allows unlimited category depth, is searchable and allows questions to be in multiple categories. And optional user question submission option is available, along with most recently added and most popular lists. Comes with MASTER Resale Rights!

58) ClickBank Thank You Page Protector Script This is a fully automated Thank You Page Script which is much more powerful than a Static HTML Page. This System will verify whether your buyer is forwarded from ClickBank after payment, order Details including the ClickBank Receipt # will be displayed on your Thank You page, this System will collect the name and email address of your buyer, a sales report will be sent to you Instantly, a Thank You message will be sent to your buyer without any delay, it adds the buyer to your Autoresponder System so that follow-up emails will be sent to promote your other products, the whole system is fully automated and easy to customize with any text editor. With this script you dont have to send a thank you message to your buyer manually, you dont have to add them to your customer database yourself, you dont have to send them promotional emails manually to promote other products, you dont have to worry about getting repeated sales and you dont have to worry about ebook and software Hackers. Comes with MASTER Resale Rights!

59) MySQL Database Backup Perl Script With so many scripts in this package using MySQL databases, I only thought it be fitting to add a script that would easily allow you to make backups of them. But this script can be used anywhere you have a MySQL database and Perl is supported, this script will save your skin over and over again. Comes with MASTER Resale Rights!

60) CGI-Based Autoresponder Script This script is very easy to install and in less than 10 minutes you can have it up and running which could be the reason it is the number one choice of website owners who want to take control of their online operations. It has highly advanced features that every autoresponder script should have. With this script you can send an unlimited number of follow-up emails and send follow-up emails everyday if you want (some autoresponder scripts allow you only 20 follow-up emails). This script also works on an unlimited number of subscribers and it will work great even if you

have 100 or 1 million subscribers. Comes with MASTER Resale Rights! 61) Fully Featured PHP Message Boards Script This is a fully featured message board system and is meant to be both powerful and easy to use for the users and the administrator. With this script you can setup an online message board community which is sure to keep your visitors coming back again and again and is especially useful for people to ask support questions for your members to answer for free :) Comes with MASTER Resale Rights! 62) PHP Submit-A-Link Style Script This Submit-A-Link style script gives you the ability to offer instant links on your site. Your ads appear above and below the links and also on the submit page. You only need to edit one file and upload which makes this script very easy to use. This script also doubles as an opt in list! When anyone submit their link they give you permission to send them email. All email addresses are stored in one .txt file, making it very easy for you to add the emails to your current email program/newsletter script! Comes with MASTER Resale Rights! 63) USENET News Client This PHP script is a USENET news client based totally on a web interface and written in PHP4 with a MySQL database at its backend which allows you to develop useful tools such as search engines, SPAM filters, subscriptions, stats, and much more. The web interface of the news group script is very easy to use, and has all the advantages of the modern webmail systems because you can search through any news group anywhere in the world without the need of setting up any program. Comes with MASTER Resale Rights! 64) PHP Image to ASCII Generator This is a PHP program that generates ASCII images from JPG, GIF or PNG images. There are several options to alter the generated output, such as color, inversed color, font sizes, background color, line height or letter spacing only to name a few. So if you are looking to generate ASCII images from regular jpg, gif or png images, look no further as this is definitely the PHP script for you and will get the job done. Comes with MASTER Resale Rights! 65) MySQL-Based Office Intranet Suite This hot script is a PHP and MySQL-Based office intranet suite similar to other more expensive scripts. It includes a news page, calendar (WebCalendar), rolodex, contact log, network status page, task list, time sheet, office survey, and more. All-in-all this is a great script and will be very useful for those who are looking an office intranet solution. Comes with MASTER Resale Rights! 66) Another PHP Web FTP Program This tool can be used to access FTP sites from behind any firewall or proxy. Simply enter the server name (e.g. ftp.ebay.com), username and password or click the anonymous button and enter your e-mail address. The script will make a FTP connection from the server it is running from. When the file is fetched from the FTP server, it will send it to the browser via the HTTP protocol. Comes

with MASTER Resale Rights! 67) PHP Based Image Watermarking Script This script aims to provide a simple way of marking an image with a digital watermark to prevent unauthorized use. It is implemented as a PHP class and should be usable inside most PHP scripts. Images are accepted either as a filename or as a reference to a PHP resource. Comes with MASTER Resale Rights! 68) Nice Looking PHP-based eCard Script/Website This script is a PHP-based eCard system that is easy to setup and use. The simple Administration Console allows the administrator to upload images (JPEGs or GIFs), add eCard categories, and modify existing settings - no more messing with HTML or PHP to get your eCard site up and running and comes with a nice looking template design to close the deal. Comes with MASTER Resale Rights! 69) A Simple Document Management System This script uses PHP to provide you with a great interface to a MySQL server that allows you to store and retrieve documents and to share those documents between users. In addition, the system uses ACL (Access Control Lists) to grant access rights to documents on a per-user basis. It allows you to distribute project documentation on a need-to-know basis, whilst keeping a central repository of documents that is accessible to all team members and easy to manage. Comes with MASTER Resale Rights! 70) PHP-based Instant Photo Gallery Script This script is a tool for posting customizable, template based galleries, by simply uploading images to the server the script is running on. The script scans the directory you point it to (via a query string), and then it stores the list of images it retrieves in an array that is POSTED from page to page as the user moves through the gallery. This method of file-list-passing makes this script significantly more efficient than gallery tools that scan image directories each time they generate a page. Comes with MASTER Resale Rights! 71) Anchor Tag Creator Script This nifty little script pre-processes HTML before displaying it to the browser locating user-defined keywords in the HTML string (or plain text for that matter), and subsequently replacing the keywords with anchor tags of user-defined URLs. Pre-defined template anchor tags are available for Googlesearches or Dictionarylookups. This script takes care that no replacement inside an HTML tag is made and also avoids matching keywords which were found inside of a pre-existing anchor tags text. With this script your website visitors experiences are enhanced by providing links to dictionary definitions, web searches or any user-defined URLs. And whats even better is that web content developers are provided with a simple way to link keywords without having to manually create all those anchor tags. Comes with MASTER Resale Rights! 72) CGI Customer Tracking System Script You can now let your customers submit their request/questions and you will get email notifications in order to respond to your

customers. A simple and colorful way of tracking customer requests with an easily configurable customer request form. A sort on customer, status of ticket, date submitted and even agents is available. Comes with MASTER Resale Rights!

73) Advanced Photo/Image Gallery Script This PHP & MySQL based photo album features include unlimited albums and photos, users and comments, automatically add and remove photos, thumbnail support, multilanguage and themes. Comes with MASTER Resale Rights!

74) Awesome PHP-Based Chatroom Script This easy to install, simple to handle, cross-browser compatible chat system comes with its own socket server. If you have a modern browser with frame support and javascript enabled, it makes use of these technologies; if you have an older browser, have javascript disabled, or even a text browser, you can still chat using this script. In contrary to many other PHP/MySQL webchats, this script can (but must not) be run using a non-forking socketserver to handle all message transport. Comes with MASTER Resale Rights!

75) PHP Counter Hosting Script/Website This script is a complete counter hosting tool. It lets you offer counter service to others from your site. Your members dont need any PHP-support on their webserver, they just pass the required data through javascript to another script that is hosted on your server. It supports IP-check with timeout, show online-users, visitor-paths, download-count, multi-page count, email-notification, admin-mode to create/del users, request new password, visitors per day, search-function and a mailing list. Comes with MASTER Resale Rights!

76) Perl Visitor Welcome Script [NEWer] With this handy little perl script you can welcome your visitors depending on the time of day. The greeting text can be modified and is inserted by SSI. Features include the ability to greet the visitor depending upon the time of day, ability to insert the script by SSI, greeting words can be adapted freely, time offset between local time and server time can be adjusted. Comes with MASTER Resale Rights!

77) Website Indexing and Searching Script [NEWer] This sophisticated, powerful, versatile, customizable and effective site indexing/searching suite comes as a pair of distinct scripts. The indexer automatically scans and indexes a web site, and the search engine, a cgi script that serves search queries for keywords over the index, displays results pages in HTML, in a standard format including title, description and relevance ranking for each matching document. Comes with MASTER Resale Rights!

78) PHP-Based Help Desk Script [NEWer] With this script you can own your ticket based help desk system that allows you to completely manage and answer your clients questions with speed in ease. Messages are archived so you can refer back to questions when they are the related which will greatly reduce the time you have to spend managing your business. Comes with

MASTER Resale Rights! 79) Complete PHP Bug Tracking Script [NEW!] This highly-usable PHP and MySQL based script is an easily deployable, web based bug tracker to aid in product bug tracking.
