

Affiliate Ad Rotator - Affiliate Code Rotation Script

[DOWNLOAD HERE](#)

AFFILIATE AD ROTATOR MYSQL Affiliate code rotation system although it DOES rotate banners, the concept is different. Similar to our superfast banner rotator but instead of rotating just banners - this script actually rotates AFFILIATE HTML used by sites like advertising.com, linkexchange.com, et.,al. Thus allowing the serving of banner images from REMOTE servers. Provides ability to quickly rotate at random your affiliate ad partners and also countercheck their statistics against yours to see if anyone is cheating you. Accounts can be set to track by impressions, clicks, or days. You can set price per click, impression, or day and the system will keep track of all your affiliate codes as they are displayed on your site in one convenient interface. System load is virtually undetectable. All stats are in realtime. Admin panel allows you to browse all accounts and their individual statistics, view all banner ads at once, modify/delete accounts, and check overall statistics and payouts you are earning from affiliate programs. Also a great script to trade banner space with other sites that use their own tracking software.
