Product Details-- Are You Ready To Run Ahead Of The Pack With The Best Web 2.0 Monetization Guide Ever Written?"Unless the rock you're living under is buried deep underneath a tree on a desert island lost in the middle of the Pacific, you're probably already clued in to the most popular website this side of the search engines. Facebook has long been held as the sacred destination of Internet Marketers. They've longed to turn the website's immense traffic into social marketing gold, but few have been able to break through and monetize the site. During the MySpace heyday, people were spoiled by the ability to use the social networking features to expand their customer base. Smart marketers would routinely find thousands of new friends and convert that traffic with simple marketing techniques. People who expected to easily make the transition from MySpace to Facebook faced a surprisingly difficult scenario. Facebook's clientele wasn't nearly as accepting a marketing population as MySpace was and most marketers soon gave up, declaring that Facebook was useless for their purposes. Why Facebook WILL Become The Next Adwords... One of the biggest complaints that people have with Facebook is the low conversion levels. Advertisers are complaining that effective campaigns are converting only 0.03 of the time. People will keep shying away from marketing on Facebook until they figure out a way to increase the monetization and until they find an effective use of Facebook's growing user base. But lets not forget that even Google's acclaimed Adwords program took longer than expected to customize before the masses were able to profit. If Facebook's expansion follows the same template (which all signs are pointing to), then the most profitable period should be in 6-12 months from now. If you want to be in prime position to profit just like those websavvy marketers did back in the early days of Adwords, this eBook is a must. Facebook Social Ads - The New Adwords Will Help You...
