[DOWNLOAD HERE](#)

How would you like if you can tell your website to change pages without lifting a finger? Let me show you how you can benefit by making your salespage change to different pages AUTOMATICALLY! Let's talk about launching your sales. Have you ever wanted to have a prelaunch offer? Do you want to tell your prospect the actual launch date? Do you want to make an offer that no one can refuse because the sales WILL end? Or if you do not want to auto launch or end your sales, then maybe you would like to make it frenzy! Like for an example you have a very unique and high value product that you want to sell: On 10th June - You sell it for \$6 On 12th June - You sell it for \$10 15th June onwards - It will cost \$23 Easy to use - Too easy that it won't involve any codes, html, SQL or even copy-and-paste! Make a prelaunch page - Before the product launches, you might want to ask visitors to subscriber to be one of the early birds! Launch sales on specific date! - Now you can launch a sales on a date your have specified and it will change the page automatically on that date! End sale on specific date - No more lying to your visitors, telling them it will end tomorrow and tomorrow never ends! Sales booster - If you have great offer that is DAMN new and hot, with the right strategy, you can prelaunch with a special price and launch it with the normal price! Flexible - Not only that you can use to automatically launch or end or launch and end your sales, but you can also use it to make your offer HOT! Can be integrated - Guess what? You can even integrate with other scripts like rollercoaster, dimesales, discount, etc! Example: during the prelaunch you run the rollercoaster script, when it launches, the offer will be at its normal price! Tags: im, plr, mrr
