

The Wordpress Profit System Plugin

[DOWNLOAD HERE](#)

I love WordPress. Its too easy to use, too effective at what it does, and its just the right price for my pocketbook. As Ive said before, WordPress is software for the rest of us -- cheap (its actually FREE, but we donate, right?), easy to use, and its good. So, I wanted to use WordPress as a platform for selling digital products. I needed to support PayPal and ClickBank and protect my digital property from being accessed by folks whove chosen not to pay first. I also needed something that made it easy for me to market products as an affiliate (to sell other peoples products that compliment mine) and effortlessly cloak my affiliate links. Lastly, Ive got SEVEN products of my own that will be going on ClickBank. With the standard ClickBank procedure, Id be looking at over \$200 in ClickBank account setup fees. Now, \$200 isnt exorbitant, but Im CHEAP. So, I needed software that would let me sell all 7 of my products in just 1 (\$50) ClickBank account. But, there wasnt really anything available that did all these things and worked with WordPress So I got with a programmer and we wrote our own! WordPress Profit System is a simple, easy to use plugin that does exactly what most WordPress site owners want when selling digital products from their WordPress website. WordPress Profit System coupled with WordPress allows the user to: Easily sell digital products with just a PayPal account -- PayPal is easy to use, but it doesnt provide a way to hide your ThankYou page or protect your download links. WordPress Profit System makes it easy to do both. Itll hide your Thank You page so that only valid customers can access it and it will expire your download page and encrypt your download URLs so that your links cant be shared or posted on pirating forums. Support multiple products in a single ClickBank Account -- WordPress Profit System lets you use separate sales, thank you, and download pages for each product you define. That means that you can place multiple products in 1 ClickBank account but still display individually crafted sales pages for each product. Automatically cloaks your affiliate links -- The benefits of cloaking affiliate links have been discussed frequently on this forum and elsewhere. WordPress profit Systems AFFILIATE mode handles this for you automagically! Protect Download Pages -- Download pages can only be accessed through a link that includes the buyers purchase information. These pages are also set to expire after a period you specify -- usually 3-5 days after the purchase. Protect Download Links -- create ugly, criptic, expiring links

that can't be easily shared or posted on freebie forums Hide a digital products actual URL -- anyone who sees your download link won't have a clue about what your download filename is. Everything's all screwed up with numbers, letters, and special characters that don't mean a thing to anyone but YOUR software. Automatically generate PayPal, ClickBank, and EJunkie payment buttons -- saving you tons of time fighting PayPals button factory or customizing your own ClickBank buttons. Plus, because WordPress Profit System is a WordPress plugin it: Is Easy to Install -- WordPress is known for its 5 minute install and installing WordPress plugins (like this one) is a cinch Is Easy to Maintain Makes it Easy to Add Content -- including new sales or review pages Is Super SEO Friendly -- Google and Yahoo really LOVE WordPress Is Easy to Customize -- both visually with WordPress themes and functionally with WordPress plugins. Supports the largest, free, most widely used payment processor in the world (PayPal) Supports the largest digital products affiliate sales network in the world (ClickBank) Supports one of the largest digital products delivery sites in the world (E-Junkie)
