Because Sometimes Life Doesnt Need To Be Complicated Finally An Instant Keyword Research Tool You Can Install And Start Using In Under 10 Seconds! In The Amount Of Time It Has Taken You To Read This Far Down The Page You Could Have Installed This Simple And Effective Keyword Research Script And Started To Search Out Highly Profitable Niche Markets... If you can ftp/upload just one file to your web server (no editing) it may actually take you less than 10 seconds from start to finish! Dear Friend, Do you love installing complicated web scripts? Or are you like me, just the very thought of spending hours editing and creating MSQL Databases, tweaking complex code and changing file setting fill you with dread? If you hate all that stuff, but would like a quick, ultra simple and low cost way of finding hot profitable niches without the hassle then youll love this . . . Finally, Keyword Research Made Simple Heres why you need to do research . . . When youre considering buying a new product to sell (resell rights, private label rights or even adsense templates) you shouldnt make the decision to buy based on how good the sellers sales pitch is. Too many people do just that and end up with products that they cant sell. The golden rule of Internet Marketing is Find a hungry market before you create or buy products to sell. If you get that screwed the wrong way round, youll be left with products that nobody wants to buy and youll waste time and money trying to sell them. Always - Find a hungry crowd first then feed them. So how do you find a hungry crowd? One highly effective way is keyword research. Doing your Keyword Research allows you to spot good potential markets quickly and easily. Its the fast track to identifying all those potential profit pots in the marketplace you can fill. However, until now most of the tools available have been complicated to use, expensive to buy or a nightmare to install. Notice the until now bit :) This Is The Reason Why This Page Exists . . . Just two nights ago I was discussing the topic of keyword research with a business associate in my local pub . . . He was gleefully explaining how hed just bought some new fangled software for \$200 that worked a treat on keyword research. However it was so good and had so many features he didnt know yet how it worked properly. (It came with a 20+ page PDF manual on how to use it!) When I pulled out my mobile phone, connected to the net and typed in a URL and showed him right there and then my own research system he almost fell out of his chair. The

screenshot below shows how easy this is to use (and my lack of skills with image editing software LOL)

Keyword Research On My Mobile Phone In The Pub! That must have taken you ages to set up, its brilliant. So when I told him it actually took all of about 10 seconds he was shocked - He then proceeded to badger me for an hour to let him have a copy of the script . . . LOL . . . and that convinced me there was a huge demand for this simple tool, it does the same thing as many expensive (and frankly, highly complicated scripts) but it does it quicker and far easier. And the real beauty is ANYONE can use it. Now as I had previously no intention whatsoever in ever selling this script, let alone writing a sales letter for it, Im going to keep this short and sweet - Ive added some screen captures below: (because my mobile phone picture above is pretty awful!) And after you click on the Get Results button these are the kind of results you get within a few seconds, You can see in the example below I had searched the key phrase tropical fish... With Keyword Explorer you can:

- Install it on one domain or one hundred and one domains (no restrictions).
- Pay no monthly fees to access the data. (Its on your sever) Keep it as your own personal secret research weapon.
- Offer access to your members or subscribers to it on your site.
- Install the 1 file script (without editing) via FTP in less than 10 seconds.
- Find Popular Search Terms From The Overture Database. Use single keywords or key phrases.

- You Do Not Need To Create Databases
- You Do Not Need To Set File Permissions
- If your server runs PHP and you can FTP just one file to your web site this will work for you! For your peace of mind Ill include an installation manual (but believe me it contains less than a paragraph) Okay so now the big question on your mind has to be okay how much does this cost? Well as I said before until two days ago Id never thought of even selling this script, it was for my own personal use so I really dont know what to charge. Some sites offer similar tools (that are harder to use) for \$47+ . . . Some sites charge monthly fees to use their overly complicated scripts. But I thought what the heck - There are a lot of people that could really use something like this that just cant afford expensive alternatives or use the complicated tools. So heres the deal - You can have this right now for just... \$5.00. Yup! If you want to get your hands on this supremely easy to use and simple research tool that really can help point your business in the right direction fast then grab this now for \$5.00 ... before I make it all fancy looking, over complicate it, add some killer graphics, a huge installation

manual and a box shot to the page and start charging five times that amount (like some other marketers would) :) And a Bonus! Okay youre kidding right? No Youre Not! Okay how about this... The first 100 people to grab a copy I will give the MASTER RESELL RIGHTS to - You get the script, the ridiculously short install manual, and Ill include a copy of this web page so you can sell it. No strict terms either: You can use it as a bonus or gift to your subscribers (theyll love you for it) You can sell it at any price you choose. Add it to a membership site. Add it to a package - Whatever you want. Its up to you. Okay - What Are You Waiting For? Click The Payment Button Below To Get Keyword Explorer + Master Resell Rights!
