

# Ultimate Searchengine Kit - Start Your Own Real Searchengine

[DOWNLOAD HERE](#)

Start your own REAL search engine, like google and yahoo! - Easy to setup and install! This is a powerful starter package containing 4 powerful scripts perfect for creating your own real searchengine. Scripts included: (banner) Powerful banner rotation script - make money on your search engine by adding banners and more. (spider) Very powerful web spider that can grab website urls and content from the internet. The web spider will search the web and add the urls to a database that can later be used in your new search engine. (microsearch) Microsearch makes it easy to create and manage an information search engine, this script can be used to add the search functionality to your database gathered by the spider. (mysqlbackup) This script will take automatic backups of your entire mysql database and give your database the best of security so you will never have to worry about loosing your entire search engine database. This is a important step that is often overlooked by many. Installation instructions and documentation can be found in the zipped file included... Detailed tags: searchengine script,searchengine starter package,searchengine starter package,searchengine kit,searchegine cgi,cript You might want to check out searchy searchengine script (a better version).
