Regards, Thomas Salvador. P.S. What is .diz? The .diz files are regular text files, you can open in your favorite text editor. The extension .diz is used that you can put the whole product AS-IS in a blog tool. This way you do not need to worry, that these lists/descriptions (a.k.a. not-alternative Medicine-content) are published on your site. The blogging tool should only process .txt-files. Hence .txt is used exclusively for publishable alternative Medicine content, but not for internal information. It is just used to make your life easier. P.P.S.
