What the #1 most important factor of any web page is. If you are trying to sell something online, I'll tell you the #1 thing you need to have on your page. For weeks I had 0 sales...but when I put this on my page, sales started almost immediately! This one thing is the difference between prosperity and bankruptcy! How to find products to sell online. If you want to sell things on your site, I'll tell you where to find products that you can sell for commission. This system makes it easy! It takes less than 4 minutes to add a product to your site with this method! How to get other people to link to your site. I'll give you a template message that you can send to other webmasters to get links for your site...just send a bunch of these and you'll help yourself to get traffic to your site. How to modify & work on your web sites from any computer in the world! Whether you are at home, at an internet cafe, or simply have a laptop, I'll show you how you can work on your website from any location in the world, as long as you are connected to the internet. Imagine how great it will be to get paid as you travel. All you need to do is check in on your site every once in a while. Here are a few of the amazing features the html software provides... Auto Pop Under This wizard will produce an automatic popunder script with a cookie that will

allow the popunder to appear only once per browser session. The window is fully customisable to suit your requirements. Auto Popup This wizard will produce a fully customisable automatic popup window that appears every time your page is opened. Banner Rotator This wizard will produce a rotation for up to 10 banners. The banners will be rotated every x seconds and include clickable hyperlinks. Color Picker 1 (by Color) This wizard will produce hexadecimal color codes from our browser safe, 216 color, palette. Color Picker 2 (by Name) This wizard will produce hexadecimal color codes and Name codes for those who find remembering the hex codes difficult. Countdown This wizard will produce a script that counts down to a specific event. Just enter the details and the job is done. Div Scroll If you have content/text or tables that are too long for your page then you can enclose the content in or tags that have a defined height, width and scrollbars. Dropdown Menu This wizard will produce a dropdown menu with up to ten menu items. By using a form dropdown box for you menu you can save lots of valuable screen space. FAQs Page This wizard will help you create a Frequently Asked Questions page with up to 10 questions. Additional questions and answers can be added to the page by "hand". The wizard will create the code for the entire HTML page. Heading Shadow This wizard will create a neat shadow effect for your headings and give your pages a lift. HTML Glossary A Glossary of most HTML 4 tags and a brief outline of their usage. I-Frames IFRAMES can help you become quite creative with your page. Our wizard will quickly help you script them into your page. Link Cloaker This wizard will produce a HTML frameset page that will help cloak your affiliate links. Link Popup This wizard will produce a fully customisable popup window that will only appear when a hyperlink is clicked. Mailto: Tag Create an email "mailto:" tag that has the ability to include multiple addressees, carbon copies, subject lines and information in the body of the email. Meta Tags Quickly create your all important meta tags. This wizard will make your coding so much easier. Create meta tags for a number of pages in one session by just changing a few variables. Miscellaneous Tools These tools will help you calculate download times for your files, view the source code of any page on the www and search for graphics for your web pages. Mouseover Image This wizard will create graphic button rollovers. Great for menus. The script will handle up to 10 buttons and also includes a preloader. Mouseover Text Create style sheet mouseover links that change color. These links will work in IE4+ and NN6+. All other browsers will see a normal link. Just choose your colors and decoration & you are done. No-spam Email Stop the email-spam robots from getting your email address from your web site by using our clever email cloaking script. Online Scripts The wonderful people at

cgiscriptshave graciously given us permission to access their database of javascripts and wizards. Page Border This wizard will create a border that surrounds the whole page inside the browser window. Page Transitions This wizard will create a number of page fade in and fade out transitions. Protect Images This method is not 100 infallible but it will deter all but the most knowledgeable and persistent thieves. Quick Scripts This is a collection of short scripts, like "No Right Click" and "Auto Bookmark", that can be inserted into your pages with little or no alteration. Random Text Give your page some dynamic content by creating up to 10 Random Text messages for your page. Each time the page is loaded a different text message appears. Scrollbars The colored scrollbar can only be seen in IE5+ browsers. All other browsers will just present their normal scrollbar. Search Engine Doorway Pages Create doorway pages that are targeted to getting your site registered higher in the search engines. Special Characters A library of codes that will enable you to print special characters to the screen. Thumbnail Popup Do you have a lot of thumbnail graphics linked to larger graphics. This wizard's script creates pages on the fly opening the graphic in a popup window with its own close button. Time of Day Greetings This script will greet your visitors with a different message depending on what time of day it is. HTML to Javascript You can convert your html to javascript with 1 click Script Tester test out your scripts on your computer before you upload them . Note Pad This is built into the software. You can use this to type up your html pages. Access to the Online Script Database. This is an amazing collection of very useful tools for your webpage. You get them all free. There are too many wonderful features to list here. Question and Answer Forum: You can get answers to your questions 24/7. There are a lot of people to help you and make sure that you get your site running quickly. Just post a question and get an answer! Online Ideas. Ideas for websites Plus, lots more Tags: web design
