My Webspy

Save Hours Of Your Precious Time And Increase Your Online Efficiency By Auto-Monitoring All Your Favorite Web Pages & Blogs For Changes & Updates... Easily! Receive Notifications & Alerts Only When Your Monitored Web Pages Are Updated. Changes Are Highlighted For You! I'm sure there are many websites and blogs that you visit on a regular basis. These websites fall into categories: business (news, competitors, partners, etc.), fun, leisure, hobbies, etc. Some of these websites you check for updates/changes once a day. Sometimes multiple times a day. More often than not, your recurring visits to these sites are a waste of time, because of their "no-change" status; their content would not have been updated since your last visit. Do you realize how much time you're wasting by doing this manually? Well, time is money. My WebSpy - Auto-Monitor All Your Favorite Web Pages & Blogs For Changes & Updates... Easily! My WebSpy Features & Benefits! Monitor as many web pages, blogs, news sites, forums, etc. as you like. My WebSpy will auto-crawl them all on a regular basis and alert/notify you of any changes/updates. Specify My WebSpy's crawling depth. This is best explained in an example. Web page you want to monitor: PGApga.com PGAlinks to GolfOnlineand TigerWoods.com. In other words, the web page PGAhas links to these two websites. Set My WebSpy crawler to ZERO, and the software will monitor PGA.com. Set My WebSpy crawler to ONE and the software will monitor for changes and updates: (1) PGA.com, (2) GolfOnlineand (3) TigerWoods.com! Web page changes, updates and modifications are highlighted in yellow. Don't waste your time comparing old and new web pages, trying to figure out what was changed or updated. Removed content is highlighted in red. Schedule My WebSpy's monitoring/crawling activity. In other words, you decide how often you want My WebSpy to check any web page; every minute, every hour, every day, every week, etc. It's up to you. Manual, on-demand checking of one or more web pages. Edit the settings of one or more links of web pages you're monitoring. Sort your list of 'monitored'web pages based on Name, URL, Last Check Time, Next Check Time, Number of Crawled Pages Sort the list of web pages that have been 'modified' based on Name, URL, Modification Time, Number of Changes.
