Lists Xtractor Pro is CGI Script to manage your opt-in ezines, mailing lists, and membership lists with a single interface. Works basically just like EXTRACTOR PRO which sells for as much as \$200. this is browser based CLONE. Our program wont time out like other programs that attempt to do the same thing. Allows you to create unlimited unique mailing lists, removes duplicates automatically, merge lists, remove from lists by substring match (EG: donotspam, edu). Email lists are saved automatically as flat file databases which are compatible with most email software. Keeps accurate count of unique emails per list in realtime. Add or remove single email addresses from any list. Also allows you to send attachments to your mailings. No modules required. Easy installation.
