Want to make your graphics stand out? "Instantly Spice Up All Of Your Web Graphics With This Collection Of Killer Special Effects Back Drops!" Want to make your graphics POP and look truly awesome? One of the easiest ways to add some flair to your graphics is by adding a cool abstract background as the back drop of your design. You can spice up and improve pretty much any kind of design with a nice abstract background. You can use plain text, with a nice background and nothing else, and you'll have a cool simple design. Fast and easy. Ofcourse if you're not a design pro, these background effects could be hard to create. So for all the design challenged people out there, I decided to create a nice collection of really cool looking abstract backgrounds. Brand new V3 collection of 36 original and awesome designs in layered PSD format... Highly customizable layered PSD source files. Each of these background images comes in a layared PSD format. That means you can take each element you see in the design, and customize it to your liking. Turn certain effects on and off, mix them up, move them around, resize them, flip and rotate them, change the colors, combine two or more designs together, take just one certain effect like a grid, and add just that one effect to your design, etc.. There's thousands of different ways to customize these graphics. So you can use them as is, and have a nice design ready to go in minutes, or you can customize them and create your own unique designs. There are other places to get these abstract bakgrounds. But, let me tell you why THIS is a great deal. First of all, the royalty free sites usually give you a flat JPEG image of the design, so you can't customize those graphics. I give you fully customizable layered PSD source files. So you can mix and combine different effects to create literally thousands of different design combinations. That's much better than just getting a flat JPEG image. Second, the price per image on the royalty free sites is usually \$1 - \$10 PER image. And that's from the cheaper sites like iStockPhoto. There are other more premium sites that charge \$25 - \$100 PER image. And again, that's for flat JPEG images that can't be customized. Third, some sites have a one time use license. So you can only use the image on one design, and then need to buy another license if you want to use the image more than once. With my package you get royalty free and unlimited use rights to the whole collection. That means you can use the graphics on as many designs as you want. So this is a

great deal here. You get 36 high quality, abstract background images, for one low price. You also get layered PSD files so you can customize the graphics fully. AND you get royalty free unlimited use rights to the whole collection. Lets recap about what you will receive... The package with 36 customizable, high quality background images Graphics. Complete PSD source files for all these files. An original sales page in english and german. Images and a Master Resale Rights License. Files for both systems, PC and Mac. These graphics are in PSD format. So you will need a program that opens PSD files like Adobe Photoshop, Photoshop Elements, or GIMP (free program). We are authorised Reseller and in the possession of the necessary licences for this product. Therefore we do not offend against the copyright! For the software & scripts no Support can be performed!
