About the Meditation 40 min With the enchanting sound of Tibetan singing bowls this meditation uses a powerful combination of Alpha brainwaves to allow you to enter a deeply relaxed but focused meditation. The session may create a strong reaction and it may take a little time to get used to it. Sometimes we just need time out! Our senses are continually attacked by outside influences and our minds need some TLC to re-charge and rest. This is a wonderfully relaxing meditation to do just that! Ideal to be used as a daytime meditation and suitable to be used along with your own visualization techniques. When we are in Alpha We are awake but deeply relaxed. We are not necessarily processing surrounding information but day dreaming or not yet fully aroused (mornings or after nap) When alpha is in normal ranges we are usually calm, relaxed and feel good. We are able to shift gears from Alpha's neutral state very easily In this stage our minds are receptive to suggestion. We can learn and absorb easily (Particularly Children) We have heightened visualization ability. Alpha is around from the moment we close our eyes to relax. Alpha can induce relaxation by deep breathing and by gently looking upwards whilst our eyes are closed - as though looking into our mind's eye! Our Guarantee When using the sessions all we ask of you is to give them a fair chance to work. Resistance, both mentally and physically, can block you from entering altered brainwave states. It may take a little time to get used to the sessions and relax into them. Regular practice ensures better results! If, however, you are not satisfied to the extent that you do not feel our sessions are what we say they are, we will give you a no fuss refund - can't say better than that! How To Use The Sessions The use of Headphones will provide a more personal and intense effect AND avoid affecting those around you. You will need to find a comfortable place to be, where you are least likely to be disturbed. If the environment is a little chilly, we suggest you have a blanket over you as your body temperature may drop. A glass of water may be needed at the end of the session. When you begin to listen to the session your mind will probably start to wander over to everyday things in your life but try to keep returning your focus to the sounds in your head; this is normal and is the learned art of any type of meditation or hypnosis. After about six minutes of undisturbed listening your brain should begin to entrain

toward the given frequencies. You may have strong visual reactions or strange feelings of altered consciousness. Try not to panic and bring yourself out of the states, allow any images to come into your mind - go with the flow, practice makes perfect! It's useful to keep a diary for you to jot down your experiences after each session for later reflection. Power meditations are a series of Brainwave Stimulation sessions designed to enable deep, hypnotic meditations and self help sessions! We sell no fuss, professionally backed audio meditations and brainwave entrainment's in mp3 download format to use with headphones. The use of Headphones provides a personal and intense effect AND avoids affecting those around you!The decision to use the Mp3 format was taken with a view to reduce the pollution caused to the environment by gross CD manufacturing!
