

Mp3 Ranking Dread In Dub - World: Reggae

[DOWNLOAD HERE](#)

King Tubby in fine style mixing great riddim tracks laid by Sly and Robbie (Tracks 1-5) with his equally well known "apprentice" Scientist on the mix with the Roots Radics (Tracks 6-10) 10 MP3 Songs WORLD: Reggae, ELECTRONIC: Drum 'n Bass/Jungle Details: I man don't want to watch no TV, I man wanna listen to a Dub LP! So says Ranking Dread on his debut dub album. Originally released in 1982 this Dub LP has gained cult status due in part to the fantastic cover art of Rod Vass. To some this is THE DUB album by which all others should be measured. It's hard for us to be objective about that statement but when you hear the incredible mixes from King Tubby I am sure that you will have to think about it too. King Tubby takes riddims laid by Sly and Robbie and injects them with a power that screams "this is a Tubby's mix". The masterful use of echo and reverb that goes to the outer edge of dub yet never loses control. Check out the stellar mix of Bob Marley's "I Don't Want To Wait In Vain". There were five tracks to a side on the original LP and the reissue LP is an exact copy of the original with King Tubby and Sly Robbie on the A side with apprentice Scientist and Roots Radics doing the honors on side B. Scientist flexes his muscles on Side B (LP) track 6 on the CD with an absolutely incredible show of echo control on the opening drum sequence, this track I play over and over. Each track showing that the Master had passed on his skills to his protégé and apprentice, then you get to one of the gems, a crucial rendition of "No No No". Not to be missed... There were only 1,000 pressed in 1982 and very rarely do they surface to the buying public. This release will give everyone the opportunity to have their own copy and play it till it's worn out... Available on CD and LP, get one for the car and one for the HI-FI. I've had the pleasure of enjoying this album for many years, now it's your turn... Jah Bless..... Kamel
