When we enter deep sleep we are in the Delta frequency, we do not dream in this frequency (REM) and it is an essential part of our healing process - if you have trouble maintaining deep sleep you may also be interested in our 'INSOMNIA' sessions

How To Use The Sessions The use of Headphones will provide a more personal and intense effect AND avoid affecting those around you. You will need to find a comfortable place to be, where you are least likely to be disturbed. If the environment is a little chilly, we suggest you have a blanket over you as your body temperature may drop. A glass of water may be needed at the end of the session. When you begin to listen to the session your mind will probably start to wander over to everyday things in your life but try to keep returning your focus to the sounds in your head; this is normal and is the learned art of any type of meditation or hypnosis. After about six minutes of undisturbed listening your brain should begin to entrain toward the given frequencies. You may have strong visual reactions or strange feelings of altered consciousness. Try not to panic and bring yourself out of the states, allow any

images to come into your mind - go with the flow, practice makes perfect! It's useful to keep a diary for you to jot down your experiences after each session for later reflection. To be on the safe side it's not advisable to use this type of audio if you are epileptic, prone to fits and seizures or pregnant. As with all meditation and hypnosis, DO NOT use whilst driving or operating machinery!! Choose To Buy Our High Quality Mp3's & Save The Environment From GROSS CD Manufacture Pollution!!
