

# Simplified Ajax Contact Form For Php And Html Websites

[DOWNLOAD HERE](#)

This contact form addon code script is very simple and can work well for any website especially both html or php based websites. You can instantly download it once you make a payment, you can edit 1 file with your email address then upload it to any location on your web server and start using it. Yes you can redesign and re-script this contact form to fit your own needs if you know how! No you do not need to link to any other websites from your website, you get the freedom of a custom built contact form. This Simplified contact form has nice validation and Captcha verification before it send the email.
