are adapting to technology and converting to online selling methods, right? Today, no company is  
successful without understanding that going virtual is vital in creating a dynamic, profitable venture. But  
Wait, Let Me Ask You This... How is it possible... that someone who worked in a factory with the reading  
ability of a 12 year old... can kick total butt in business and embarrass a hoard of guru's by making a six,  
even seven-figure track record - without even having a company building? How is it possible... that
