ATTENTION: If You Want to Virtually Guarantee You'll Be One of the Elite Internet Marketers of the Future Then Don't Close This Page Until You've Read Every Word "Here's How You Can Instantly Gain an Almost Unstoppable Edge On Your Competition, Increase Your Sales Conversions, and Build Your Profit Margin to Massive Proportions with This Incredibly Powerful Secret Tool" In Less Than 60 Minutes From Now You Can Be Creating Your Own Money-Making Software without Knowing a Single Thing About Writing Code or Without Having to Hire One of Those Expensive Programmers. From: Timm Miller Dear Fellow Marketers, It's no secret to anyone that you can rake in incredible profits selling software. I'm talking millions... and perhaps even billions. Obviously not everyone is capable of creating windfalls of this magnitude but you get the picture. And, of course, not everyone has the technical skill and knowledge to create software. The development costs are staggeringly high... as in hundreds of thousands of dollars for some software applications. Not to mention the time it takes to write the program. Who has that kind of time, money, or knowledge? NOT MANY... Imagine, though, if you could just skip all the rigamarole that comes with research, development, programming, packaging, etc. - and just get down to making software! Would that be a riot? As utterly crazy as it sounds it's not impossible... in fact, it's down right easy with my new program called... "Software Maker Pro." "Imagine Being Able To AUTOMATICALLY Create Professional Looking Profit-Pulling Software Applications In Just 9 Incredibly Simple Steps... all in About 30-60 Minutes!" What if you could have a professional software designer on retainer for you 24 hours a day 7 days a week that could create software applications whenever you wanted all for just a one time low payment? Imagine the money you could save or better yet imagine the potential profits you could bring in by creating and selling your own software! Sound like a pipe dream?... Well it's NOT. And in a minute I'll show you exactly how you can get this amazing software generating tool for your own use. Do you have thousands of dollars just lying around to hire a programmer to write code for your next software idea? I would venture to say probably not. Do you have the time to learn programming language and write the code yourself? Maybe if you don't mind waiting ten years before you'll be any good at it. With This Mind-Blowing Marketing Tool You Could Be Saying Good-bye to Failure FOREVER! Now imagine this

You've just come up with an idea for a software application that could significantly help solve a nagging problem in your niche. What do you do next? Do you just sit there wishing you could find someone to design the software for you, do you wallow in self pity because you know you are about to miss the profit boat again simply because you don't have the resources to make your idea a reality or do you open your software-generating program, put in the recipe and whip out that new software within the hour!

Personally, I prefer the latter. It's already a proven fact that people not only love software, they WILL pay for it. Most folks are lazy (and practically EVERYONE is pressed for time) and if you can provide a legitimate alternative to work they'll jump all over it. Now There's An Affordable Way to Create Your Own Software Without Spending a Fortune! Why should only a select few have the chance to make their own software? Everyone should have a fair chance to create and sell their own software without going into eternal debt or maxing out their credit cards. Thanks to this exciting design in software technology, you can make practically all the software you want instantly... at the push of a button. You may never have to waste your time or money again. This powerful new software will generate as many applications as you want you are only limited by your imagination. New to Internet Marketing? That's fine too! Because Software Maker Pro is designed so even the newest of marketers can use it without difficulty. There are no scripts or codes that you have to enter and figure out on your own. To hire a good professional software developer and programmer can cost anything up to \$200,000 per product! So I could easily be charging \$497 for this software, and you'd be getting a tremendous bargain... but I'm not going to be charging anywhere near this much. And here's the reason why: I've been in your position and I know how hard it is. The sole reason I created this software was so that I could help people like you to create professional software applications quickly and easily and without having to spend hundreds or thousands of dollars. In fact... version 1.0 (that's the current version) cost \$14,195 to develop and the upgraded version (currently being developed) could be priced at around \$1,000 once it is released. So to offer this software for \$497 would be denying the reason for me creating it in the first place. I have therefore decided to offer it to you for the AMAZINGLY low price of just \$197.
