Wouldn't you agree that Twitter is one of the hottest things going right now in the online marketing world? Everyone and their mother is signing up and getting a Twitter account. Shouldn't you be leveraging the power of Twitter for your benefit? Of course! But what bugs me is there are so many services, software, scripts etc out there dedicated to helping you profit from your Twitter account.. but to benefit from them, you have to pay a monthly fee. Or if its a one-time payment, its for \$197, \$297 etc...Not exactly peanuts. And well, I know for many marketers out there just getting started, they just don't have the money to invest. So many don't even bother with trying to profit from Twitter due to this one little inconvenience.. Twitter is all about relationships and about building a good rapport with those that follow you. Once you have a loyal following of "fans" you can direct many of them (even hundreds or thousands) to whatever website you want all for FREE! This is the power of Twitter.. Because if you have a ton of people that look up to you, respect you, or just think the stuff you tweet about is cool... you can get lots of eyeballs to things you recommend.. and lots of eyeballs on whatever website you want could mean lots of profits for you! If you're like me, you might have thought or be thinking, "That's all fine and dandy but who has time to tweet every day and get followers? I sure don't!" Look, I know what you mean.. I'm married with two sons under 3yrs old and another one on the way! :) I know exactly what you mean about not having time to tweet every day. I am not one of those super Tweepers that are glued to their Twitter accounts all day long. I've got things to do and there are days when I don't remember to tweet... So how can I keep in front of my Twitter followers if I forget to log in sometimes? Well, I knew that when I don't tweet, those following me don't hear from me... and that means I am just leaving money on the table. So I thought to myself, "What if I could have a script that does just that.. send tweets for me like an autoresponder?" I knew there are services out there that do this for a fee that also include all sorts of other stuff I can do with Twitter.. But I don't need all of the other stuff.. I just want my Twitter account to work for me when I'm not online! Plus some of those sites are just way too cluttered and confusing to where I don't even want to fool with them or even know where to start. Well after talking to my coder, we developed an awesome, easy-to-use system that allows you to do just that... an autoresponder for your Twitter account that anyone can use!
