"How To Surround Your HTML Code With Barb-Wire And Double Your Affiliate Profits" HTML Code Guard Who would You Trust To Watch Over Your Email Address, Affiliate Links And Thank-You Pages? What you are about to read could change the way you do business online. I want to talk to you about one of the biggest problems on the Internet today. Until now, I only received one email from somebody who almost doubled his income from affiliate programs in 5 minutes flat using my program You will be absolutely stunned after studying the paragraphs below... FACT! According to Tom Hua, Internet Marketing Authority, up to 30 of your affiliate programs are being quietly stolen even now. I believe everybody (and his/her aunt) has heard about ClickBank. Think about it. If you promote a ClickBank Affiliate Program what prevents Joe Sixpack from replacing your affiliate id with his own and pocketing the commission? It's like taking the money out of your wallet. These Internet Pickpockets do not necessarily have felonious intentions. They are replacing the link just because this way they save up to 50. While you might wonder how many affiliate commissions you lost this way let me ask you one question... Have you ever seen an affiliate link like this: bestwebhostingintheworld.com?id=4512 and instead of clicking the link you just went to bestwebhostingintheworld I think you can now clearly see my point. Now let me ask you another question... How many times have you tried to bypass Paypal payment and looked in the HTML code for the return link? (yes, it's possible even if right-click is disabled) How many times have you clicked View- Source to 'borrow' a good-looking form ? How many times have you viewed a site's source to see the posting location and get the free report/ebook they were offering for subscribing to their newsletter .... without subscribing! Yes, I bet you are very likely to have committed at least once one of these crimes. And imagine how many have done this unto you ... I have another question for you which at first might seem unrelated to the previous ones but this one sure is important ... How many times have you received SPAM ? Wouldn't it be amazing if finally, youll be able to stop spammers dead in their tracks and keep your site and affiliate profits safe just as easily as you answer the phone or open the refrigerator door... This is what my brand new program is all about. It's called HTML Code Guard v2.1 and it's the nightmare of all internet criminals. What it does is keep your website

and your profits safe from Internet pickpockets! HTML Code Guard has a user friendly interface and it's extremely fast. Our program is so easy to use even your pet will like it! The Custom Link Generator adds professionalism to your links by displaying custom text in the status bar The Email Address Generator stops spammers dead in their tracks, ruining their attempts to harvest your email address The Affiliate Link Creator has strong, strong encryption with the added JavaScript protection You see, some people already know how to crack the following protection which is offered by most of today's affiliate link encryptors : Our affiliate profits protection combines 2 numeration bases: decimal and hexadecimal making it impossible to break by 99.80 of the people visiting your site. It looks like this: 3B2623463B26231083B26231053B2623 1183B26231013B2623493B26231123B2623 1113B26231193B 26231013B2623114 3B26231083B26231053B2623 1023B2623 You Protect Your Links And Your Commissions You Keep Your Visitors At Your Site - the visitor will never suspect you are promoting an affiliate link. All they will see is your website like in the picture below. You Have Easy To Remember And Identify Links You Are Able To Track How Many People Clicked On Your Link You Can Submit Your Affiliate Links To Search Engines because our program automatically generates a search engine optimized page. HTML Code Guard can: Hide Paypal Return Links Hide Real Posting Location Keep Your Private Data Away From Evil Eyes The CodeGuard offers an advanced encryption mechanism, different from that of the Affiliate Link Creator. How To Protect Your Web Pages And Double Your Profits From Affiliate Programs Order Now and Receive Master Resell Rights, Keep 100 of The Profits! What is HTML Code Guard? It appears that some people have a mental block that prevents them buying from an affiliate. They prefer to strip the affiliate link and go directly to the main website simply because they don't like you having their hard earned money. Others just don't feel the same certainty and security when buying from an affiliate. This costs you lots of sales. Experience and testing have shown that by using this type of software (phpAffilink) your affiliate links will be clicked by two times as many people, thus doubling your profits ! HTML Code Guard is a software program that will protect your page by encrypting the HTML code and cloak your links so that the text you choose will be displayed in the Status Bar. It's simple to use, but it's results are far reaching. This version of HTML Code Guard includes phpAffiLink, a software that will act as a link rotator effectively managing affiliate links. This will make affiliate links actually point to a page hosted within your website. Why use HTML Code Guard ? hide affiliate links hide paypal success links reduce the risk of having your page copied handle private data (hide POSTing location)

scramble your web page to keep important data away from unauthorized eyes. I hope your realize that you actually need this type of software. And it can be yours today for only . . . $19.97! You'll be kicking yourself for weeks if you don't take advantage now. Do not procrastinate, the offer is limited! This software retails for $37.00 but right now you can purchase it from ebooked for just . . .$19.97 (10.55). With your purchase you are granted the right to sell this product for its retail value of $37.00 if you choose. ... we will even give you a ready-made sales page template! Don't delay. Get HTML Code Guard today for just $9.95. We cannot hold this price forever! Tags: html code, affiliate programs _____ See My Store For More Deal!!! magama.tradebit.com _____
