Samsung i760 AT&T Tilt i710 Tilt 8925 Not Compatible With: ===== Operating System:  
Windows Mobile 2003 or under Programs: Video Call, Smart dialer and other dialers Please check before  
installation, you'll need apprx. 9 mb free space in main memory. Q: - How do I install a CAB file? A:  
Installing a CAB file is very easy. you just download the CAB file to your device. (preferably to your  
memory card). Then you just navigate to it on your device though Explorer and click on the CAB file. The  
CAB file will then start the install. If your still not sure you can search Google:  
[google.com/search?q=install+cab](http://google.com/search?q=install+cab) Q: - What if my Wisbar has expired? A: You will get a 7 day trial of  
Wisbar with this theme. If you continue to use it after 7 days you will need to register it. You can register  
and download the full version of Wisbar Advanced Desktop at: [lakeridgesoftware.com](http://lakeridgesoftware.com) Q: Why can't i  
swipe the pages anymore? A: Most likely you are in "Author Mode". To quit "Author Mode", just hold your  
stylus down on an EMPTY area on your screen (not on an icon). When the menu pops up, choose  
"Author Mode" again. (If you dont see "Author Mode" then you did not choose a blank area.) Q: - How do i  
customize the buttons? A: Easy. Hold your stylus on top of the icon and choose author mode, then do it  
again and choose properties. Next, when the screen comes up, choose edit script. Now you can edit the

current feature and choose what is appropriate for your phone. FYI you must go back out of author mode the same way. HINT, to find an empty area on the page, hold down your pen to get the menu. To quit Author Mode, try the bottom left clock icon. Q: - What if i get a black screen after install? A: Easy. Just hold down your stylus on your screen. Then, choose 'Settings'. Next, click "Change Theme". Then choose "iPhone\_WAD2\_Portrait" and then click "menu" at the bottom. Choose "Set As Portrait Theme". Do the same for Landscape. Q: - What if my clock icon is not showing the correct time? A: Go into Author Mode and then go into the properties of the clock icon. Then you will see an option for your timezone. Just set it to your timezone. Testimonial: ----- 1. I'm completely satisfied. It's money saving and amazing. The finger gesture feature is really cool!!! Thanks a lot! Gary E, Hawaii. 2. Took me about 35 minutes to complete everything and now I have my own iPhone. Great deal. Thanks! - Jessy M, Texas 3. I lost my iPhone and I'm not going to spend the money again. I downloaded your software to my old Motorola E6 and now I have my iPhone back and it's newer and better. The best part is the FingerGesture. Thanks a lot! - Bella K, New York. 4. Great stuff! Honest seller. Superdeal! - Tim M, California 5. Thank you so much for the amazing FingerGesture iPhone. Love it! Jerry L, California 6. You rock! This is really a superdeal. Highly recommended to anyone! Ben B, Florida This is a Digital Download product. You will receive the DOWNLOAD as soon as you purchase. Thank you! Customers are KINGS! Your Satisfaction Is My Priority! I GUARANTEE YOU 100 PERCENT SATISFACTION OR YOUR MONEY BACK! Buy it from a reliable and experienced seller.
