Secure Your PC From Prying Eyes System Cleaner is specifically designed to protect you! Unknown to many, the Windows operating system and Internet Explorer maintain files and registry settings related to ALL of your online and offline activity. Our software is designed to clean your system of all these tracks so your computer activities can remain private. You'll also find the performance of your computer may increase once you've cleaned your system. You'll Be Able To Clean... History - Internet Explorer maintains a list of every website you visit while surfing the Internet. How many days are stored in the history cache depends on your personal settings. To clear your history cache, click the "Clear Now" button. To clear the history cache when the "Clear All" button is clicked, be sure to check the "Clear My Website History" checkbox. Cookies - Websites you maintains a list of every website you visit while surfing the Internet. How many days are stored in the history cache depends on your personal settings. To clear all cookies, click the "Clear Now" button. To clear all cookies when the "Clear All" button is clicked, be sure to check the "Clear My Website Cookies" checkbox. Favorites - Most of you are already familiar with favorites. These are websites you've bookmarked so they can easily be found later. Take caution when clearing your favorites as once System Cleaner clears them they cannot be undeleted! To clear all favorites, click the "Clear Now" button. To clear all favorites when the "Clear All" button is clicked, be sure to check the "Clear My Favorite Internet Places" checkbox. Keyboard - Auto Type Type URLs - Have you ever noticed when you start typing in the browsers address bar an attempt is made to "guess" what you're typing? For example, if you've typed in "get-a-divorce.com" and your spouse uses the computer after you and begins to type in "get-rich.com", they will see "get-a-divorceas a "suggestion" because it's been typed in before! To clear all Typed URLs, click the "Clear Now" button. To clear all Typed URLs when the "Clear All" button is clicked, be sure to check the "Clear Auto-Typed URLs" checkbox. Auto-Complete Forms - Auto-Complete Forms is basically the same as typed urls except guesses are made in text / edit fields of web pages. Practical uses are to remember common information you type in often like email address, name, address, etc.. To clear all Auto-Complete Forms, click the "Clear Now" button. To clear all Typed URLs when the "Clear All" button is clicked, be sure to check the

"Clear Auto-Complete Forms" checkbox. Auto-Complete Password - Auto-Complete Passwords is extremely convenient if you are the only one using your computer. But what if you are leaving town and having someone house sit. You may not be too comfortable know that anyone can log you accounts without even knowing your password. To clear all Auto-Complete Passwords, click the "Clear Now" button. To clear all Auto-Complete Passwords when the "Clear All" button is clicked, be sure to check the "Clear Auto-Complete Passwords" checkbox. Run / Find History Run Program History - The "Run" function from the Windows Start menu maintains a list of all programs you have run from this dialog. To clear all your Run History, click the "Clear Now" button. To clear the Run History when the "Clear All" button is clicked, be sure to check the "Clear Run History" checkbox. Find Computer History - The "Find Computer" function from the Windows Start menu maintains a list of all computers you have search for across the network. To clear all your Find Computer history, click the "Clear Now" button.
