How would you like to build your Niche Empire selling your own line of hot selling products without having to hire an expensive ghostwriter or graphics designer? You see, its not a secret that almost every successful marketer has their own product AND they create multiple streams of income. Creating multiple streams of income with your own product is a very important success criteria to meet, for a couple of obvious reasons: For one, you can start branding yourself as an authority figure or expert in your niche - something which you cannot achieve in the shoes of a mere affiliate or reseller, You can exercise full flexibility and control over your product content, format and delivery, pocket 100 of the profits instantly every time you make a sale (minus merchant transaction fees) - vs. affiliate marketing whereby you have to wait 14 - 30 days before getting your commissions, and if one business does happen to fail, you still have others that you can fall back on by not putting all of your eggs into one basket As you can see, having your own products to sell offers numerous advantages that you cannot find in being an affiliate for someone elses product or even as an AdSense publisher. If Having Your Own Products Is The Way To Go, Then Why Isnt Everyone Doing It? This is where the barrier of entry sets in for most people. Its called Product Creation. I dont have to convince you how challenging creating your own product is. To begin with, it can take days, weeks or even months (depending on your writing skills) before you finally complete your first Info Product. And if you dont have a gift for writing and graphic design, it might just take longer. Sure you can hire ghostwriters from E-Lance to do the dirty work for you and a graphics designer to design and code your website but do you have the budget? What about niche marketing research? Now all these can spell a BIG put off for everyone, Internet newbies and seasoned pro marketers alike. If youre wondering whether you can enjoy the benefits of having your own hot product to sell without writing another word in content ever, then I have something in store for you...
