The Incredible Power of the Subconscious Mind The medical profession has for a considerable time recognized that there is some hidden power in human beings which can effect a cure much more rapidly and permanently than any administered medicine. As Dr. Mitchell Bruce once wrote: We are compelled to acknowledge a power of natural recovery inherent in the body a similar statement has been made by writers on the principle of medicine in all ages. The body DOES possess a means and mechanism for modifying or neutralizing influences which it cannot directly overcome. This power is the subconscious

mind. You see, we are all of two minds the objective mind which operates through the five physical senses and controls all of our voluntary motion and the subconscious mind which controls all of our silent, involuntary and vegetative functions. Now, in proper, healthy or normal conditions of life, the objective mind and the subconscious mind act in perfect harmony with each other. When this is the case healthy and happy conditions always prevail. But, unfortunately, these two minds are not always permitted to act in perfect harmony with each other; this brings mental disturbances and excites physical wrongs, such as functional and organic diseases. Happily, thanks to the How to Put Your Subconscious Mind to Work ebook you can now learn the techniques and secrets you need to know to keep your objective and subconscious minds in harmony with each other; and should they get out of harmony, and disease and pain result, they can be brought into harmony again and perfect conditions of health restored, all by suggestion. Thats right, by suggestion alone. Its true, by learning to control your subconscious mind you can learn to relieve pain and control disease all with suggestions. When doctors and psychologists speak of the effect of the mind on the body and the health of the body they are dealing with definite facts and with laws capable of scientific proof. For it is known now that the subconscious mind, which is at once the master of the body and the servant of consciousness, is the bridge between the body and the mind.
