Keep your Windows clean! Its quick, its easy and it works. Dont you hate it that Windows gets slower and slower the longer you use it? One of the main reasons for this is that software is almost never uninstalled completely. Most application programs dont provide enough information for the Windows Add/Remove Programs tool to be able to uninstall them properly. So every time you test a program and then remove it you have a little more junk left over clogging up your computer. After a while your Windows operating system is like a back yard full of rusty bicycles, old beer cans and broken bathtubs. Tags: xp, sex, sexy, porn, porno, free
