You are looking at an auction for an unlocking service for only ONE AT&T/Cingular Blackberry from anywhere in the world. This phone unlock removes the carrier lock placed by many cell providers these days. It enables you to use your phone with any sim card from anywhere in the world regardless which provider you bought it from. Supported Models: 5810, 6210, 6280, 6710, 7100g, 7210, 7230, 7280, 7290, 7780, 8700c, 8800,8300 Pearl 8100 Samsung, Motorola, Treo, SonyEricsson, HP IPAQ If you have a Cingular Blackberry 8700c from The Cingular launch party ( In black leather box ) this service will not work for your phone. How it is Done: All that needs to be done is include your IMEI# in the Paypal notes box when you make the payment.(If you decide not to include this information it is impossible for Us to process your order). The IMEI#: The IMEI Number can be obtained when you enter \*#06# from your phones keypad, it will display a 15 digit number ( If you have trouble obtaining the IMEI this way you can also find the IMEI on the back of the phone under where the battery is ) How long does it take to get the unlock Code? Once your order is processed and unlock code is ready you will be emailed with an unlock code and instructions on how to enter it, Turnaround for this Item is 24 Hours. In the rare case that no unlock code is found for your Blackberry a full refund will be issued immediately. READ THIS BEFORE YOU BUY THE ITEM: To unlock the 8700c you must have a SIM inserted ( This can be an active or inactive sim ) For all other Blackberry models you can perform the steps without a SIM inserted . This service will NOT remove any power on user codes .There is only one type of subsidy unlock code for your phone, once entered your phone can be used with any sim card, and on any GSM network in the world. The unlock code I will supply you with is the only unlock code that exists for your phone. Once the unlock code is entered your phone will never re-lock even if you upgrade the software or hard reset your phone. Every phone only has a certain number of unlock attempts you can try before the phone is hard locked. If on first attempt your unlock code does not work, do not keep attempting to unlock, contact me

immediately. When your phone asks for an unlock code it is NOT asking for your personal SIM PIN unlock code. If you choose to enter this instead of the unlock code I supply, I will NOT refund you. You must include the IMEI from the phone itself and not the IMEI from the box that your phone came in. Please read any supplied directions carefully before attempting to unlock your phone. When you purchase an unlock code, it is a one shot deal that works for the IMEI I process. If you need a replacement phone unlocked later you will need to purchase the service again. I am not responsible for helping you setup internet on your Blackberry.
