Are you depressed at the thought of emailing your eBooks and software? Are you tired of customers complaining they haven't received their purchases? Are you struggling because you don't have enough time to start new projects? Are you failing because you're finding it difficult to build your mailing list? Are you not using the power of a system of automated digital delivery? Well that's all about to change... FOR GOOD! I work from home (yes, it's great thanks!), and I sell digital goods on and off eBay. I make life easier for myself by using automated digital delivery and protected downloads, and shortly you'll be able to as well. More on that later... (eBay Sellers click here to jump to the part that will interest YOU...) But right now I have some BAD news for you. If you sell any digital goods online, you're suddenly in BIG trouble! With the rise of Web 2.0, if your downloads aren't protected you're going to be fighting a losing battle as you get ripped off by more and more freeloaders. You might now be thinking, but what's happened, what's changed? And after a quick check of your logs, you'll also be saying things like "What the...? 20 sales and 95 downloads...? How can that be...?" And with a sinking feeling, you'll be realising you're yet another victim of link sharers. You're not alone... Most digital goods sellers don't protect themselves against free downloads. I know the thinking behind it - "it won't happen to me" or "I might get one or two, but I can live with that." Well I'm here to tell you that while those statements might have been true a short while ago, they're completely wrong now. Things have changed. It will happen to you if it hasn't already. It won't be one or two either. It

will be a flood of illegal downloads from your site. So what's changed? And why is this affecting you? Well, the last couple of years has seen the rise of Web 2.0 - "Power To The People!" - and now more and more sites exist that work on the principles of empowering people to make choices. And while there are a lot of benefits to those - you can now market your products in new and interesting ways - they come with a price. Tags: marketplace script
