

# Mtk Mediatek Firmware Editor

[DOWNLOAD HERE](#)

We offer you a tool/software with which you can change the media files of your firmware. So you can customize almost everything and can look different. The program is very very easy to use. 1. Choose your firmware. 2. Select a directory where the files are extracted. 3. Next click on Extract Media Files button and wait until it is ready. 4. Choose a directory in which there are the new media files. 5. Now select e.g. a wallpaper picture of what they want to replace with an image of the firmware. 6. Now click on the Upload button to the new image in the firmware to write. Diving Out The files you will need to have the same size or smaller than the original. The MTK Media Editor tool works with all phone Clones with MTK chipset. \*\*\*\*\* Like us on Facebook:
