Blogging is little more than an electronic version of something many of you have most likely had and used earlier in your lives, and some of you may still be using to this very day. What is it? Read on to find out. What The Heck Is A 'Blog' Anyway and Why Do I Care? Plain and simple a blog, or weblog as some refer to it, is nothing more than an electronic journal or diary you use to enter your thoughts or ideas using web-based programs. But, a blog can be so much more than this. It can also be used to enhance your online business or personal site. It can be used to offer up tutorials or free content you may not want to include on your regular website. In fact, a blog can be a website in and of itself! Blogs are designed to be whatever it is you want them to be, giving you complete creative control over every aspect of your blog. Using a blog can be very beneficial to you whether you have an online business or you simply need some sort of emotional expressive outlet to be you. And they are extremely easy to create, use, and profit from even if you have never made a blog in your life! If It's So Easy, Why Has No One Used It Before Now? Most likely it's because they just don't know about blogging. While blogging has been around for years it's popularity is just now beginning to grow, and at an alarming rate! There are millions of blogs that can be found all across the internet with millions more expected to be created before the end of 2004. Now is the time to use this simple form of publication to your advantage. Another reason could be that because using and creating a blog is completely free,

many online marketers tend to steer away from these types of tactics believing that free solutions have no value and in turn do not work. In most cases, this is true, but not when it comes to blogging. One last reason to ponder is skepticism. Maybe it's hard to believe that something you have never heard of can be so simple to use and give you the freedom to write about what you choose and it can even make you money. Plus it's free too??! Yeah Right! But this is fact and not fiction. It is possible and easy and profitable and you have everything you need all in one kit. So Whats In It Already?!
