

Solar Pool Heater Plans Build Your Own Collector Panel Diy

[DOWNLOAD HERE](#)

So you are thinking about using the Sun to help heat your pool water ? Great idea ! In fact many satisfied people have come before you and used Solar energy this way. A solar pool heating system usually costs a few hundreds of dollars to buy and install. You will learn with this manual how to build such solar system on you own with much less budget. All you need is a basic skill using only handsaw and a drill, thats why I am calling it easy project. The system is so simple to build it wont take more then 1 hour to build. The materials needed for this project can be purchased in any local hardware store. My manual (PDF) also contains detailed material list with photos, step by step guide with 3D drawings that will insure your success. I bought the plans from all other sellers, mine is the most detailed and cleared manual. Dont mess with a pile of pipes laying beside your pool or heavy metal structure that cannot be moved or adjust. The final result will be aesthetic collector that you can place anywhere you like. With this system you can expect increase of pool temperature between 14 20 degrees. My son just sold his 10th Solar system across our neighborhood using this manual that we both developed and designed. I also included my one page of how to automate your system with only 2 components. This way the system will start and stop automatically according to outside temperature. Just read this feedbacks I received lately: David, Thank you for the quick email. My husband and I went to the Lowes yesterday, picked up everything we needed, and made one last night and one today. Both work!!! and we are going to make 2 more to add to these. I have an in ground pool that used to cost me \$1,200 for 10 weeks. Now at \$5 a gallon it would cost about \$3,000 for 10 weeks. I'm over 70 and I hate cold water. I like it at 86 degrees, so I may make more panels. Thank you for the information. I really appreciate it. Sincerely, Edna. Bless you David. My pool went from 76 to 90 with the solar panels. I only wish I had seen your ad sooner, I could have saved a fortune on propane gas. Someone wrote me to ask if the panels worked. He saw I had bought the solar information and emailed me. I told him how easy and how fast they worked. Thank you again. Mrs C If you are not 100 satisfied with your purchase I will refund your money. Tags: diy, pool, solar
