Ardamax Monitoring Tool V2.8

DOWNLOAD HERE

Ardamax Keylogger is a keystroke recorder for monitoring EVERYTHING people type on the computer. In total stealth, the program records keystrokes made in all applications Microsoft Word, Outlook Express, Skype, Internet Explorer and anywhere else, makes snapshots of the screen and saves captured information to an encrypted log file. The log file has a time stamp and the name of the application where the keystrokes have been captured. You can view the log in the built-in Log Viewer, or have it sent to you by email, via LAN, or get it uploaded to the FTP server. The program leaves no traces of its presence and cannot be discovered by the computer system. Other users do not suspect they are being monitored and cannot see the program in Windows processes, even with advanced process viewers. The program can be accessed by the user who knows a valid access password. Ardamax Keylogger runs on Windows 2000, XP, 2003, Vista. Get Started Now Its Easy! Be always in control of whats going on your computer when youre not around! Tags: spy, tool, v, keystroke, recorder
