Web Site Monitor Service Php Script Allows you to create your highly Profitable Website Monitoring And Uptime Business Service Without Spending A Huge Amount of Money. You've Probably Invested a lot of Time, Energy and Money Building your Web Site but How do You Know that Your Site is Up or Not? Eliminate the Risk of Failed Internet Transactions and Loss of Revenue and Credibility Dear Friend, When your company is spending its marketing dollars on attracting prospective customers to your website. 24 hours a day 7days a week monitoring of your website for availability and performance is critical to proactively identify website problems. Many web hosting services guarantee you 99.9 uptime or better. How will you know if they are living up to this guarantee without some form of external monitoring? Let's take it from the prospective client/partners/customers viewpoint! When customers/clients visit your web site and it's not available because the server is down. Do they wait around for it to come back online again or contact you to let you know? In most cases simply No they go straight to your competitors site and buy from there. Not only have you lost a sale but also a potential new customer for ever. There are millions of web sites on the Internet and only perhaps five percent of site owners have an idea of how their site functions. Site Monitoring service checks performance on all your websites and lets you know immediately when a problem occurs so that you can take prompt action to rectify this. With Web Site Monitor script you can start an advanced Website Monitoring service that ensures the reputation and uptime of your business as well as charging your customers a fee for monitoring their sites as well. You can make money with this service by charging a monthly fee. Monitoring Interval - You can setup crons as to how often it will check i.e every minute, every 5 minutes, every hour or every 24 hours. Monitoring service will check users site at the same time each interval. Web Servers - Our monitoring servers read the web page from your server and check the HTTP status code returned. Instant Down Alert - Sends instant alert to users informing that there site is down with date and time. Users will receive Real-time error notifications. Recovery Alerts - Sends instant recovery alert when site comes back with the date and time as to how long your site was down. Email Reports - Reports are emailed showing down time or reliability. You will receive weekly reports. Online Status - You can also check online status via your

control panel and see the current status of the site. Local Time Zone Support - You can configure alerts and reports to be in your local time zone and date. So all reports and alerts have times and dates that make sense to you. Problem Reminders - Users will keep receiving email alerts to remind you if their server remains down. Earn Extra Revenue by Selling Profitable Membership Service. There are two types of Membership: 1- Free Membership Free Members registration is absolutely free. User on this account can only add only one site for monitoring. Edit/delete their site. User will be sent email alert if the server is down and also when the server is back up. Weekly summary contains simple statistic information. Free Members can upgrade from their members area. Can check their site status anytime. Can Edit Their profile from members area Can add 2 different emails to receive notifications to both emails address to ensure that user has received notification. 2- Premium Paid Membership Premium Members: Charge them monthly subscription via Paypal or 2checkout Can add unlimited sites for monitoring Can set time zones for every site they add Can add/edit/delete all their sites Can Edit their profile from members area When one site is down the premium user will receive an email ALERT with the date and time of the site being down When site is back user will receive site recovery alert with time lost due to downtime. Weekly summary contains full statistic i.e Site average access time, percent of uptime, number of times sites down with time and date, total downtime etc Can check all sites status online via members area anytime they like Can add 2 different emails to receive notifications to both emails address to ensure that user has received notification. If they un-subscribe monthly membership script automatically downgrade this users membership instantly. Admin Control Panel: Password protected admin Area: Admin can Edit, Delete, Downgrade, upgrade users accounts. Admin can see all users accounts details including membership status. Including id, Email, User status, Name, Company, Country, Active/inactive Admin can see All users sites they add Admin can also check all users sites Status from Admin Area Admin can contact via email all members or contact a single user from admin area. Script is on template base so the site owner can Edit site templates very easily Site owner can also Edit all emails notification templates All site pages can be edited i.e Home page, Help/FAQ, Terms of Service and Contact us. Online businesses are growing extremely fast on a daily basis. Site monitoring service demand is increasing because the last thing you want is to lose money and customers without even knowing about it.
