Overview Your Uninstaller! is a complete solution for uninstallation tasks. Monitor, analysis, cleanup and rebuild. Makes your PC clean and stable. With advanced uninstall scripts, Your Uninstaller! can solve most uninstall problems. As the industrys leading uninstaller program, worlds the 1st Drag&Uninstall uninstaller under the Windows platform, using Your Uninstaller! has never been this easy. Imagine! Just a drag-drop and the unwanted program will be completely removed - no any trace left! Key features * Fix invalid uninstallations in one click. If you often install/uninstall software, you will most probably face these corrupted programs, let Your Uninstaller! 2008 fix them. * Full system scan after a program being uninstalled for complete removal. Your Uninstaller! 2008 scans whole system for related traces and completely remove them after normal uninstallation, you will not notice the program has ever installed. * Force removal of a program. For some hard to remove programs, this is a good choice, extremely useful for old-fashion programs. * Keep system stable and clean with various system tools. Your Uninstaller! 2008 has built-in system tools like Uninstaller, Startup Manager, Internet Traces Eraser, StartMenu Manager, Disk Cleaner to keep Windows clean and in order. * Easy to Use. No expert knowledge required. Usability is always in our mind when developing products, Your Uninstaller! 2008 is simple and straightforward to complete all tasks. No hassle, no confusion. * Windows Vista Compatible. Your Uninstaller! 2008 is Windows Vista Compatible both for 32bit and 64bit versions. Of course, it also works for Windows XP and perfectly. * Safe and Trusted. Your Uninstaller! 2008 is 100 virus and spyware free. No crashes, seizures, slow downs and error messages with the safest and most trusted solution from a leading software vendor. How does it work? As you know, there are many installers in the world, such as InstallShield, Wise Installer, Microsoft Installer and many others. Most applications installed on your PC are built with these installers. Each installer has its unique install database, which makes it difficult to find all the changes programs make to your computer. To solve this problem, Your Uninstaller! has an advanced feature called: SmartUninstall. SmartUninstall knows more than 100 installer data format and could search the entire disk for traces left by normal uninstaller. It performs system level monitoring and scanning to get good result. Sounds complex? No! You do not have to know this, for all these operations

can be done in a few clicks, its transparent to end users. Completely Uninstall Your Uninstaller! completely takes the place of Windows Add/Remove program, while offering you many more features. Your Uninstaller can list hidden programs that you cant view using the Windows Add/Remove program. The standard Add/Remove program often cant uninstall applications completely-leaving broken registry keys and unused files on the hard disk. Big registries and large numbers of unnecessary files make system slow. Your Uninstaller! clears broken keys and files in seconds using SmartUninstall! Remember to use Your Uninstaller! weekly to Make your PC Fast and Clean!
