

# Backlink Generator Software

[DOWNLOAD HERE](#)

Backlink Generator Software PERSONAL USE RIGHTS ONLY! Increase Backlinks and Improve Site Traffic With Just a Click of a Button! We have heard of off-page SEO, that has to do with building backlinks from many sites. And one of the shortcuts is to use stat sites or sites that analyse your site giving you free backlinks. However, that is also quite tedious if you have to SEARCH and VISIT each of the stat sites you have found, entering your site and such. What if you have 4 sites? Do you want to go search and visit all of the stat sites all over again? Or would you rather do it with a click of button and get back to your own project or just do something else? I am a webmaster, a web developer, a teenager and someone who is just so busy. I have similar problems and I was thinking what if I could just buy a software that does backlinking? Wordpress commenter? Nah, it will get moderated and hardly approved. Article submitter? Nah, it is going to take some time to produce an article. And thinking for solution, I finally thought of a simpler method and it is basically submitting my website to stats sites! But I havent heard of any software that does that when I did my research yet there are people offering such stats submitting services for at least \$10. And I am sure that these service provider uses some sort of program to do it. After months of researching and learning software programming, I finally managed to create my ideal program! Take a look at the video demo above! As this is one of my first few programs that Ive created for commercial, I am offering this software for only \$7! PERSONAL USE RIGHTS ONLY!
