The Instant Membership Site Creator is an easy to use tool to create your own Password Protected Membership Site. I know what you are thinking. Either: 1. I've looked for a membership script and they are to expensive. Or. 2. I tried to setup a membership site and it was to complicated. Or. 3. If it's so affordable, it can't be any good. Well now you can create a membership site in less than 60 Seconds. Even if you have tried before and Failed. I guarantee it. And expensive? Well you saw the price right at the top of this page. And anyone can afford that. And how can it be worth a toot if it's so inexpensive? Because we designed it to be simple, yet secure and reliable. We left out all the hyped bells and whistles. It does what it is designed to do. Let customers pay to join your membership site and keep track of them. Here is a link to one of my membership sites. You can't get in unless you have a user name and password. Give it a try. E-Book Reprint Rights Simple, but functional. Let's customers join and choose their own username and password, then let's them login instantly. Also provides an admin area for you so you can edit and/or delete members or even add members as necessary. More about this below. Ok let's get into the nuts and bolts of this thing. No more MYSql database setup. No more having to mess with the .cgi files No more having to get the .htaccess or .htpasswd files exactly right. Instant Membership Site Creator does all that for you. Just start your desktop application with a mouse click and fill in the form and WALA. Your Membership Site is ready to fill with your content. That is all there is to it. Instant Membership Site Creator does all the hard work for you. You just supply your domain name where you want your instant membership site created and your user name and password along with the location of your members area and admin area, you can set this to anything you want. Then you select your admin login details and hit create and you have an Instant Membership Site. You then supply the content to your members area and all that is left to do is get people to your site and your ready to start excepting residual income. And the Instant Membership Site Creator will work on any PC with Win XP, 2000, ME, 98, 95 or compatible

OS. You can create a membership site in almost all Unix/Linux webhosts with Net::FTP module. This tool works perfectly in most Unix/Linux webhosts. This has all your information for: The members folder. The admin control panel and admin password that you selected. The link where your customers will be sent after they pay to signup, this is where they login after they signup. The members lost password utility and the secret folder for your password file. You can save this to your hard drive and print it out so you will have all the information handy if you need it. Your membership site is totally hands free, except for adding new content, once you have it setup, and that takes about a minute or less. Once your customers pay you can have them automatically sent to the signup page where they fill in there details such as user name, password, name and email address. Once that is done they are automatically given access to your members area. No waiting for you to approve anything. You are happy because you get paid and they are happy to have instant access. And you don't have to worry about hackers attempting to create a membership account without making payment. This tool will create a random signup form URL with numbers and letters that is very difficult to guess. Also the name of Users' Database file will also be named with random numbers and letters combination for extra security. And they are ready to go just seconds after paying you. They just fill in their name and email address then pick their own user name and password. And you can create as many password protected directories on a website as you like. You could create a different directory protected for different levels of memberships. Such as Silver, Gold or Platinum memberships. And you may also use it on as many websites as you like. Inside your Admin Control Panel you can perform all your maintenance on your site like the setup, or you can list all your members, edit their account info, delete them if necessary or even add someone manually. You have acces to their user id, password, first name, email address, how they paid, the date they joined and their expiration date and their IP address. And you won't be answering emails because someone can't remember their password. They can get it emailed to their email that they enter on their membership signup form. This is so damn simple even my Mother-In-Law could do it. How much? Today $20 Master Resell Rights You Also Get This Sales Page And Different Size Graphics To Create Your Own Unique Sales Page.
