You can also edit the

sales-letter to make it unique and stand out. Use the products as backend sellers - you can upsell any of the products to your customers in your Thank You Page or even on your One Time Offer page. Video Format That You Will Be Getting AVI format - AVI is the original highest quality format of this video. This is the format that I originally record to. You can just use these files to create your own original edited version of the videos. You can easily edit the videos, add your own watermark, add or edit part of the videos, convert the videos into other multiple formats, etc. The freedom is virtually endless if you have these source files. Since AVI is very high quality it can be great for delivering to customers however the size of the videos are generally very large.
