----- Ebook : Magazine Publishing You Can Make Thousands
By Publishing Your Own Magazine! Exclusive Offer! Never Before Revealed Information! 11:35 am,
Friday Morning Dear Friend, Are you tired of being a slave to the rat race? If so, you have probably
thought about how you could make money independently. But after seeing scam after scam on the
Internet, you might wonder if theres any hope for making money on your own. Well, maybe you are
approaching the matter in an incorrect way. Instead of searching for a get-rich-quick scheme, you need to
be focusing on building a legitimate business. This is the only way you can truly secure your financial
freedom. Yet, if you dont have much capital, what businesses can you establish? Well... Thanks to the
ease of self-publishing, any person, rich or poor can start a magazine business! Thats right! A person of
virtually any budget can begin journeying into one of the most prosperous businesses on the planet...
magazine publishing. All they need is time, creativity and an open mind. Large amounts of money arent
needed, as its possible to publish magazines for as low as \$1 per copy! But dont start jumping for joy just
yet. Even though magazine publishing is fun and relatively easy to get into, most authors prefer to
self-publish books. As a result, there are very few resources either online or offline that tell you EXACTLY
what you need to do to achieve success as a magazine self-publisher. And the few resources that are
available give information that is so general, you almost want to get a refund for wasting both your time
and money. So, does this mean you should abandon any hope of starting your own magazine company?
Of course not! You just need to look elsewhere for your information. And fortunately for you, this site can
be that elusive place. Why? Its because The Complete Guide Fully Explains the Secrets to Creating,
Publishing and Marketing Your Own Magazine... You will learn how you can turn a basic magazine into
an enterprise so successful, while spending little capital! What other business allows you to sell your own
product with such a low startup? Indeed, you would be doing a disservice to yourself if you avoid getting
this little-known information! Affordable Printing Options for Your Magazine 1) Print-on-Demand Learn
about printing companies that charge less than \$120 for a set of 25 magazines. If you can sell each

magazine for \$10, you've already made a profit of \$130! 2) Hiring Entrepreneurial Printers If you don't mind getting individuals to do your work, you can get your magazine printed at even lower prices! you will learn about a resource that will have hundreds of professional printers clamoring for your assignment! Here is what you will learn inside this guide.... How Much Is That Worth To You? Now, if you're like many people, you might think that you can find all of this information on your own. And if you are one of those types, I say go right ahead. You'll be spending the next several weeks or even months trying to find the information that *How to Start and Run a Successful Magazine* uncovers. And this is assuming you will be able to find anything at all. Remember, there aren't too many publications on this subject, mainly because so few people know that the opportunity is out there! Still not convinced that this ebook is the perfect solution for your financial situation? Well, think about what your alternatives are if you don't start a magazine business. If you're not spending even more money on at-home scams, you're wasting time applying for business loans you might not even get. And even then there's no guarantee you'll be able to obtain the success you need. With my approach, there's no need for business loans because everything would be funded through your own resources. Since you don't need that much capital to start with, it's possible you can start your business from a credit card or your savings account. I even talk about how saving just \$85 a month can get you funding money. You get a blueprint on how you can affordably make money with magazine publishing. It won't even matter if your subscribers are getting their publication for free. In fact, this is one of the best ways you can make money from a magazine, because it gives you a larger list of subscribers. And more subscribers equal more advertisers. Bear in mind too that advertisers WANT an opportunity to publish in a magazine. But if they're a small business, they may not have \$6,000 for a one-page ad. Yet, they will probably have \$200, which is an amount you could charge for your own publication. Get 10 of these advertisers, and you would've made more money in 1 issue than many people make for a month's worth of full-time work! Also, imagine the boost your portfolio would get being able to say you publish a magazine. This is especially important if you are a writer or a journalist, where your work means more if it is showcased in print. As a magazine owner, you would accomplish this goal through ingenuity and independence—qualities companies love. So, can you see how powerful *How to Start and Run a Successful Magazine* is? I could easily charge \$500 for the information it contains, but then it wouldn't be accessible to the people that would need it the most. That's why I've decided I'm only going to charge \$17.
