AtomicFTP Client provides the perfect combination of performance, security, and ease-of-use for the active internet user and webmaster. Whether you are publishing a new Web site, downloading the latest digital images, music and software, or simply transferring large files between your home and office, AtomicFTP gets the job done quickly and easily every time. FTP (File Transfer Protocol) is the most commonly used method of sending and retrieving files to and from other computers over the Internet. All you need to manage and transfer files is the use of a computer which has a direct connection to the Internet. Just enter the name (or numeric address) of the server you want to transfer your files to or from, add your personal username and password, and press connect! With a simple FTP program like AtomicFTP, you'll have a live connection with a remote computer in a flash! Tags: ftp, file software, reseller software, resale rights
