Need a fast, affordable way to take advantage of the online video revolution? Introducing Video Web Wizard...The easy way for you to start using & profiting with online video! This software is so simple that you could have one or more streaming videos on your website just 10 minutes from now! First off, Video Web Wizard converts all the popular video formats and a few, even, that most comparable software programs don't support. Video Web Wizard supports AVI, WMV, MOV, MPG, FLV, VOB, ASF, and MP4 video formats. (Don't understand all that computer-speak? That's fine, you don't have to. All it means is that you won't find yourself frustrated with Video Web Wizard because it's not able to convert a certain video format!) Video Web Wizard converts these video files into a file format called "FLV," or "Flash Video." It's a technology that works with almost all computers and web browsers, even computers running on a non-Microsoft operating system like Macintosh or Linux. By the way, when you see a video on a website, 99 percent of the time it is probably in Flash video format. Why? Because Flash works almost everywhere, like I just mentioned, and Flash videos usually have a small file size (so they load quickly) while keeping good quality. Many times you can compress a file to 10 x's or less of its original file size! Then, after Video Web Wizard automatically converts your video into Flash format, it generates a small web page with your video on it, complete with a player and controls (play, pause, volume, and so on). Upload this page to your website, and you're done!
