I was an overworked high school teacher working an exhausting 80+ hours per week and then I discovered... "How to Break All The Rules And Build a Super Responsive List That Puts Money In Your Pocket On Autopilot" Frustrated and don't know where to turn? Know you need to build a list but don't know how to start? Going round in circles day after day? The Real Secrets of Online Income I feel your frustration, but the good news is you're finally in the right place for answers. The only place where you'll get the real story from someone who doesn't care about the consequences. Just a few short months ago my online dreams were hanging by a thread. Instead of giving up I ignored everything I'd been told and started again. I wiped the past from my mind and started an internet business on my terms and the results were simply *shocking*. I discovered.... * Overdelivery and value were more powerful than hype and spin - The experts told me I was crazy as I ditched the spin and concentrated on substance but my subscribers thanked me and the rewards were stunning. * The most effective form of viral marketing is a loyal group of subscribers who are stunned by your content - Instead of spending hundreds of dollars on expensive software I focussed on looking after my subscribers and in return they looked after me. * Giving away content for free meant receiving more back in return ? I stretched myself to give away fantastic freebies at every opportunity and my list thanked me by buying the next promotion in their droves. * Trusting your subscribers, and not training them, is the fastest way to online profits ? I treated my subscribers like members of my own family and they responded by becoming red hot raving fans. I ignored the experts and did things my way and I was blown away by the results. In short, I did everything upside down and back to front.
