[DOWNLOAD HERE](#)

The top 5 reasons for offering an online HTML newsletter.... The more words in your eMails, the greater the chance that the spam filters will send it straight to the trash can - bad news for you! People are tired of boring black and white eMails with tons of text! They simply just don't read them anymore! HTML newsletters are archived and indexed on search engines because they are actually web pages on your server. They will in fact INCREASE your web site traffic. HTML newsletters give you a way to present your material in a creative, attractive, and fun way to your subscribers. It's not a secret that eMail is being filtered by the billions today. With this new software, any webmaster can create, print, and display their own attractive, well-designed, html newsletters in a flash! Tags: html,java,im, plr
