Everything works and is exactly like on swoopo.com, but with more add-ons You will find several swoopo/telebid scripts over the internet: -Feisty script - the one with 9 templates using cake php and broken bid butlers and broken registration.(this script is definitely not worth for a website with more than 50 users). -techbids script(bid packs,bid butlers dont work) -Most other clones - encrypted with backdoors and callbacks REQUIREMENTS: PHP5+ Mysql cron access curl installed Knowledge of cronjobs and curl Install instructions sent after purchase Due to so many types of web hosting configs - we can not promise that this script will work on all host (it does on dreamhost, gatorhost). If you have problems - in most cases it is that you need a different we host. Demo: 2kurusa.com
