Description text: Discover How to Create POWERFUL, SEO-Optimized Niche Content Sites With A Few Easy Mouse Clicks! NO HTML or PHP Knowledge Required! People usually like websites they can contribute content to. In fact, people are more likely to tell their friends about a dynamic interactive site as opposed to a static, non-interactive website! Not to mention the fact that search engines generally give preference to dynamic sites over plain HTML websites! This is the reason why CMS (short for Content Management System) driven websites are slowly replacing plain HTML websites. CMS-powered websites have many advantages over plain HTML driven websites, such as: a) You can easily update a CMS-driven website with a few mouse clicks. Compare this with the process of updating a plain-HTML website - you have to use a webpage editor to update each and every webpage individually, and then use an FTP client to re-upload those webpages on to your server. Oh, Just Too Much Work! b) CMS systems let you create interactive websites where site visitors can interact with you in various ways. Make no mistake my friend, if you want your website to attract repeat visitors, it needs to have a lot more than just text content. The days of text-only sites are over or, at the very least, coming to an end. If you want to have a winner niche website, you need to have: articles, advice, tips, jokes, games, audio, video clips. Your site should allow people to give their opinion, to rate content, to tell you what they like or don nott like; or else, they would just leave your site without you ever knowing why. However, Content Management Systems, good as they might be, suffer from certain limitations. Unless you are willing to invest a thousand dollars, you would certainly encounter one or more of the following drawbacks: a) Bloated software and badly written code b) Too heavy and inflexible. Unless you are a professional programmer, expect to cough up a few hundred dollars if you wish to make some custom changes to your CMS-powered website! c) Insecurity: Do you know how many times WordPress has been hacked? Sure, they keep releasing security fixes quick and fast, but these updates are still not enough to protect you from "zero-day" SQL attacks that can happen anytime! Just ONE such attack can DESTROY your entire business in minutes! d) Lack of product support e) Lack of features, or loaded with too many unnecessary features f) Too expensive, or has domain-wide limitation: One thing I have found common with most

commercial CMS softwares is: if they are affordable, they are limited to just one domain, which means that you have to cough up additional money for each additional domain you install the software on! If the software does not come with such a domain-wide limitation, then it is sure to be darn expensive! Have not you ever wished life could be a little easier and happier? Have not you ever wished you could get hold of a website creator software that is as interactive as your favorite HTML editor while being as flexible and easy to setup as a CMS solution? If you have ever wished to build a niche site with a few mouse clicks, and do not know a tad of HTML or PHP code, VIP Interactive Site Creator Suite is what you really need! VIP Interactive Site Creator Suite allows you to create and manage interactive SEO Niche sites where you can have articles, tips, jokes, pictures/images, audio, video and games, as well as have ratings and comments by site visitors, and a lot more. Just a few of the many benefits of using VIP Interactive Site Creator Suite for building your SEO-optimized, niche content sites: a) Easily manage content, templates, ratings/comments, and users of your niche site from an extremely easy-to-use admin panel! b) Add, edit and manage all content in categories/sub-categories: articles, tips, jokes, pictures/images, audio clips, video clips, and games. c) Let users rate all content and add comments. Admin can moderate the rating/comments of users. d) Add, edit and manage: -Users -Content such as newsletter, advertisement and user comments -User credits -The meta tags of any page on your site e) All pages will have static links for SEO. Remember that dynamic links are NOT suitable for search engines! Static links are what search engines love! Here is what Google says: "Reasons your site may not be included: Your pages are dynamically generated. We are able to index dynamically generated pages. However, because our web crawler can easily overwhelm and crash sites serving dynamic content, we limit the amount of dynamic pages we index." f) Monetize your website with Google Adsense. With our VIP Interactive Site Creator Suite, adding your Google Adsense code (or any other ad code) is as easy as pie, and you can control everything from your admin panel! Your ads will be displayed on all pages in header and footer areas. g) Build a mailing list by letting your site visitors/users subscribe to your newsletter! h) Powerful search tool lets users search through your site, such as content, pictures, video, audio, games, jokes, newsletter, etc. i) Customizing the look and feel of your content site is easy, and requires NO programming or technical skills on your part. We are even giving away 10 cool themes along with VIP Interactive Site Creator Suite for FREE, to help you get started as quick as possible! j) Manage both normal hyperlinks and hot links with just one click! k) Multimedia - users can watch videos using video section and listen to audio files in

the audio section. l) Users can add static and hot links (requires admin approval). Have your site visitors contribute links to the hottest content in your niche! m) A games section where administrator can add different games to be viewed by users. n) Easily and quickly view all the statistics of your website at a glance with the powerful "Report Generator" tool. It generates reports for your site for any time period! And MUCH MUCH MORE! VIP Interactive Site Creator Suite comes with FULL Source Code Master Resale Rights!
