Increase Email Open Rates - Get Your Messages Read. DeskTop Pop is a brand new program that lets you build mini applications that sit in your prospects system tray (the bottom right of your screen next to the clock). === Dear Friend: Let's face it: It doesn't matter how carefully you crafted your email or how long you spent putting that killer offer together if more than half the people on your list never even see your e-mail. E-mail marketers are losing out big time and its getting worse. Spam filters... Ouch! But they are only one part of the problem, aren't they? Why?... Well, even if your message isn't jettisoned into some black hole by an over-zealous spam filter, there are so many OBMs (Other Bloody Marketers:) competing for the eyes and ears of your prospects and it's getter harder and harder to stand out in the crowd... Don't Let Your Business Go The Way Of The Dodo! Look... I'm sorry about this, but here's a question you'd probably rather not think about let alone answer... How much extra profit do you think you'd earn if every message you sent to your list was actually seen and read by everyone you sent it to every time? I'm talking about... ...A guaranteed 100 open rate! Yes! Your Wish Has Finally Come True... With DeskTop Pop You Can Guarantee They'll Get Your Messages... Every Time! DeskTop Pop is a brand new program that lets you build mini applications that sit in your prospects system tray (the bottom right of your screen next to the clock). This little 'silent salesman' quietly monitors the web page you tell it to (as often as you want) until you update that page. When you do... Bam! The application springs to life and lets them know! What does this mean to you? In simple terms, it means you never need to worry about your prospects seeing your latest offers because you won't be worrying about your e-mails getting through. As soon as you update the page they'll know about it! === This Full Package Includes: * Desktop-Pop software (.exe file). * Sales and Thank You pages (.html editable files) with all necessary images. * Master Resell Rights licence (.pdf file). * User instructions (.pdf file). === Here's just a few of the ways you can use DeskTop Pop: * Newsletters. Guaranteed delivery of every issue of your newsletter: no more accidental filtering or blocking of the e-mail version by ISPs and filtering software! * Special Offer

Alerts. Your prospects get instant notification of all your latest special offers! * Backend Promoter. Strike up affiliate partnerships and promote them through your DeskTop Pop. * Affiliate Updater/Motivator. Inform your affiliates of your new promotional material and products. Keep them up to date with their affiliate stats and motivate them to make YOU more money! * Membership Sites. Run your membership site through your DeskTop Pop and your members will always know as soon as you add new content. * Product Updates. Inform your customers of the latest updates to your products so they can get instant access without even opening their browser or e-mail program! * Download Area. Have your website download area contained within your DeskTop Pop so you can bring people back to your offers long after they download your freebies! * And many, many more! The possibilities are endless. All these things will bring people back to your site again and again to buy your products!

.... Let me show you exactly how DeskTop Pop works. All you do is simply open the program, fill in a few simple options, and press 'Build Application'... Your DeskTop Pop will create a file ready to distribute to your prospects and customers! Yes, That Really Is All You Have To Do! Then, the next time you want to bring them back to your website or send them a sale's message, you simply update the page you entered when creating the program, and within minutes your prospects will receive an alert direct to their desktop. Build Unlimited Numbers Of Applications. Once you own DeskTop Pop, you can build unlimited numbers of applications in just seconds, create them for every site you own and distribute as many of the mini applications as you choose. There are no restrictions on how many applications you build, there are no monthly fees.

.... All my files has been checked and veryfied. You can order right now in total confidence.

.... P.S. Before I sign off, let me tell you about another possible use for this software that isn't covered in the sales letter above... Why not build a little DeskTop Pop application for yourself so you can keep an eye on your own favorite web sites. If you want to know when the site owner makes changes to a specific page now you can. Simply use their URL instead of your own and youll get an alert each time their page changes... Did Someone Say SPY ON YOUR COMPETITORS?... Ooh, Id never dream of it :)
