"Get Unlimited Supply Of High PR Backlinks And Laser Targeted Traffic From Major Bookmarking Sites... All Done In Minutes On Autopilot!" Just Fill In Some Blanks And Press The Start Button, And You Can Start Increasing Your Affiliate Commissions, Product Sales And Adsense Income Today! Web promotion is all about getting links and traffic to sites. You can build one million quality sites but with no proper web promotion, you will never see money coming in. Most web promotion tactics have one thing in common - trying to rank high in search engines results. In the old fashion days, I loved to submit my sites to hundreds of link directories. It worked like magic until the search engines changed their algorithms. Then the next big thing was Blog and Ping. It was one of the most powerful web promotion system. I could easily get my pages indexed in a couple of hours and rank high in search engines. But once again, the search engines saw this coming and as a result it is now very difficult to rank one's websites on search engines, based on Blog and Ping. Article submission is one of the methods I used. However, though it is still a very effective traffic generating tactic, it is also very time consuming. I spent thousands on SEO tools and even hired an SEO expert. I spent hours doing Search Engine Optimization on-site and off-site. I did see some traffic now and then but the figures were not something i am proud of. I was at the mercy of the search engines and was spending more time and money than I could earn! I was desperate for a real traffic generating solution. I needed to be able to get traffic fast! To my luck, I found the very answer to my web promotion pain. "With Social Bookmarking, You Can Tap Into An Unlimited Supply Of Targeted Traffic And High Quality Backlinks For Free!" You might have heard all the buzz about the term Social Bookmarking. What is Social Bookmarking & Why is it so powerful and different from other web promotion tactics? Social Bookmarking websites are basically sites that categorize and store 'bookmark links' (links which take one to a specific website). Millions of visitors flood these Social Bookmarking sites to search for information. So the idea of bookmarking is to post links back to your web page from these Social Bookmarking websites. You need to specify some keywords (we call them TAGS) which categorize your bookmark. This allows others to search and even vote for your bookmark. Social Bookmarking is in a league of its own because of its ability to generate traffic by sharing links. Let's see what some benefits of

Social Bookmarking are . Benefits Of Social Bookmarking More Targeted Traffic Since your bookmarks are categorized into different TAGS, you will get very targeted traffic from people searching within a particular TAG. They will click on your bookmark link and visit your site. Your tags will rank well in the search engines due to the authority these sites have. Faster Search Engine Indexing Most of these Social Bookmarking sites are authoritative sites. The search engine spiders visit these sites so often that your links will be crawled almost immediately! Higher Search Engine Ranking Getting one-way incoming links is the main factor to higher search engine ranking. With Social Bookmarking, you can get unlimited 'keyword' links to your site. Having more keyword links that are relevant to your site will result in higher ranking. Better PageRank Having high PR Social Bookmarking sites linked to your site will improve your site's PR. With a higher PR, you can link to your new/existing sites and improve their ranking too! You can even monetize on it by selling links from your site! It sounds almost too perfect but it is not without its downside. If you run a lot of sites, you might end up getting exhausted! Social Bookmarking Is Time Consuming... In order to bookmark your sites, you need to manually create your accounts at Social Bookmarking sites. Creation of accounts doesn't take much time because you only need one account. So what is the problem? The problem lies in bookmarking your pages. You have to manually login to your account at each of these Social Bookmarking sites and add your page's url, keywords and descriptions. It will be crazy if you need to bookmark everyday! In my case, I needed some kind of automation real quick and I bought most of the Social Bookmarking tools out there. You know what? There are 6 big problems with using social bookmarking software: 6 Big Problems With These Tools Most Are Spam Tools Most of the social bookmarking tools are designed to spam the bookmarking sites. These tools will auto-create random account login names and passwords. Their main function is to create multiple accounts and have them bookmark the same url. Having hundreds of accounts created from the same ip address and having terrible randomized usernames will raise a red flag. The Social Bookmarking sites will ban your accounts for sure. Worst of all, they might even ban your ip address! Some Are Only Designed For Certain Sites Some of the tools are very limited. They are not designed to bookmark any sites. Some are only made for RSS feeds while others are just plugins for wordpress blogs. If you have many sites which are not blogs or without RSS feeds, you will not be able to bookmark with these limited tools. Most Are Over Priced With Monthly Fees These tools are sold at cut-throat prices. They know most people are desperate for an automation solution and will pay almost anything to get them. Some social bookmarking services even

charge ridiculously steep monthly fees for the use of their program. They make it sound complicated but it isn't! They just want your money! All Have Duplicate Content Problem When you bookmark your sites, you will be bookmarking the same Title, Tags and Description across multiple bookmarking sites. This will create duplicate content issues which will result in the search engines ignoring your bookmarking links. I would not be honest if I said all of them are no good. Each tool has its very own unique feature and I have always wished I could have all those features combined in one software! That's when I decided to develop my own social bookmarking software... Presenting BookmarkingDemon Just in case you are wondering if BookmarkingDemon is a demonic blackhat spamming social bookmarking tool - The answer is NO! It is not designed to spam! Some social bookmark automation tools that are not designed for spamming are accused of blackhat because most users are using them the wrong way! E.g. A doctor gave some sleeping pills to a male patient to aid him in his sleeping disorder. But the male patient used the pills to spike somebody's drink. What the patient did with those pills is totally out of the doctor's control! You know what I mean... I have seen many users bookmarking hundreds of URLs daily! This is an obvious spam and all the links and the account will be deleted. There is no point bookmarking so many web pages when they are all deleted almost instantly. Creating hundreds of accounts is a spamming tactic! All I did was bookmark a few links in the morning and some at night. That is all I did! Up till now, none of my links and accounts are deleted! To sum up, Blackhat tactics are usually short-term tactics and they are all about volume. On the other hand, Whitehat tactics are long-term tactics that will make your sites last longer in the Social Bookmarking sites and rank higher in the search engines. Now, let's look at what you can do with our Social Bookmarking Software.
