Move over windows. - theres a new player in town! he doesnt crash or give you blue screens. hes as fast as lightning - and he is FREE! you dont have to use windows anymore - even if you are new to computers. there is a rock solid alternative called ubuntu that is wrapped in a windows-like package. One of the best things about Ubuntu is that you can use it on older computers and make them into relevant machines again as they will run the software and surf the net at lightning speed. This is because it is a light and highly optimized operating system. You can install Ubuntu and Windows at the same time and switch between the two when you boot the machine. So go ahead and give it a try! You have found a resource that will walk you through the process of installing and using Ubuntu step by step. Get started today!
